# Bank of England

↗ UI/UX

I worked with the Bank of England to update the design of their menu to be able to accomodate multiple tiers of content. We also worked on the design of the header for the homepage to make the search system more accessible, as well as being able to display more content. Finally, I re-worked the results page and UX for the filter options to provide more clarity on what is available to the user.

The Bank of England

Promoting the good of the people of the United Kingdom by maintaining monetary and financial stability.

This screenshot shows the 'News, publications and events' section of the Bank of England website. At the top, there's a navigation bar with links for 'Explore', 'About', 'News and publications', 'Museum', and 'Contact'. A search bar is also present. Below the navigation, the main content area features a heading 'News, publications and events' and a sub-section 'Latest and upcoming releases from the Bank of England'. On the right side, there's a 'Related links' sidebar with options for 'RSS feeds' and 'Subscribe to emails'. The main content area displays a grid of 20 news items, each with a date ('6 April 2020') and a placeholder title ('The maximum length title will wrap across 3 lines before collapsing in to an ellipsis here...'). Each item also includes a link to 'Publication // Weekly Report // Wrap to second line'.

This screenshot shows the same 'News, publications and events' section but with various filters applied. On the left, a 'Filter' button is visible. On the right, there's a 'Related links' sidebar and a 'Clear All' button. The main content area now shows a grid of 20 news items, each with a date ('6 April 2020') and a placeholder title ('The maximum length title will wrap across 3 lines before collapsing in to an ellipsis here...'). Each item includes a link to 'Publication // Weekly Report // Wrap to second line'. The right side of the screen is dominated by a large filter sidebar. It includes a 'Search this area...' field, a 'Clear' button, and three tabs: 'Latest' (selected), 'Upcoming', and 'All filters'. The sidebar also contains sections for 'Filter by type' (with checkboxes for Bank Overground, Event, Knowledge Bank, News, Prudential Regulation, Publication, Speech, Statistics), 'Filter by topic' (with checkboxes for Quarterly Bulletin, News Release, Monetary Policy Committee (MPC), Research, Working Paper, Monetary Policy, Financial Policy Committee (FPC), Weekly Report), and 'Date' fields for 'From:' and 'To:' with placeholder dates 'dd/mm/yy' and a 'Clear' button.

# Korn Ferry

↗UI/UX

The 'Atlas' Intranet system we designed for Korn Ferry was awarded 'Intranet of the Year' for 2020 by Nielsen Norman Group — an extremely prestigious UX award. My work on this project included working as the primary designer for our 'Atlas' system, as well as working on bespoke webparts such as emergency COVID-19 response components and elements of their Client Hub financial dashboard.

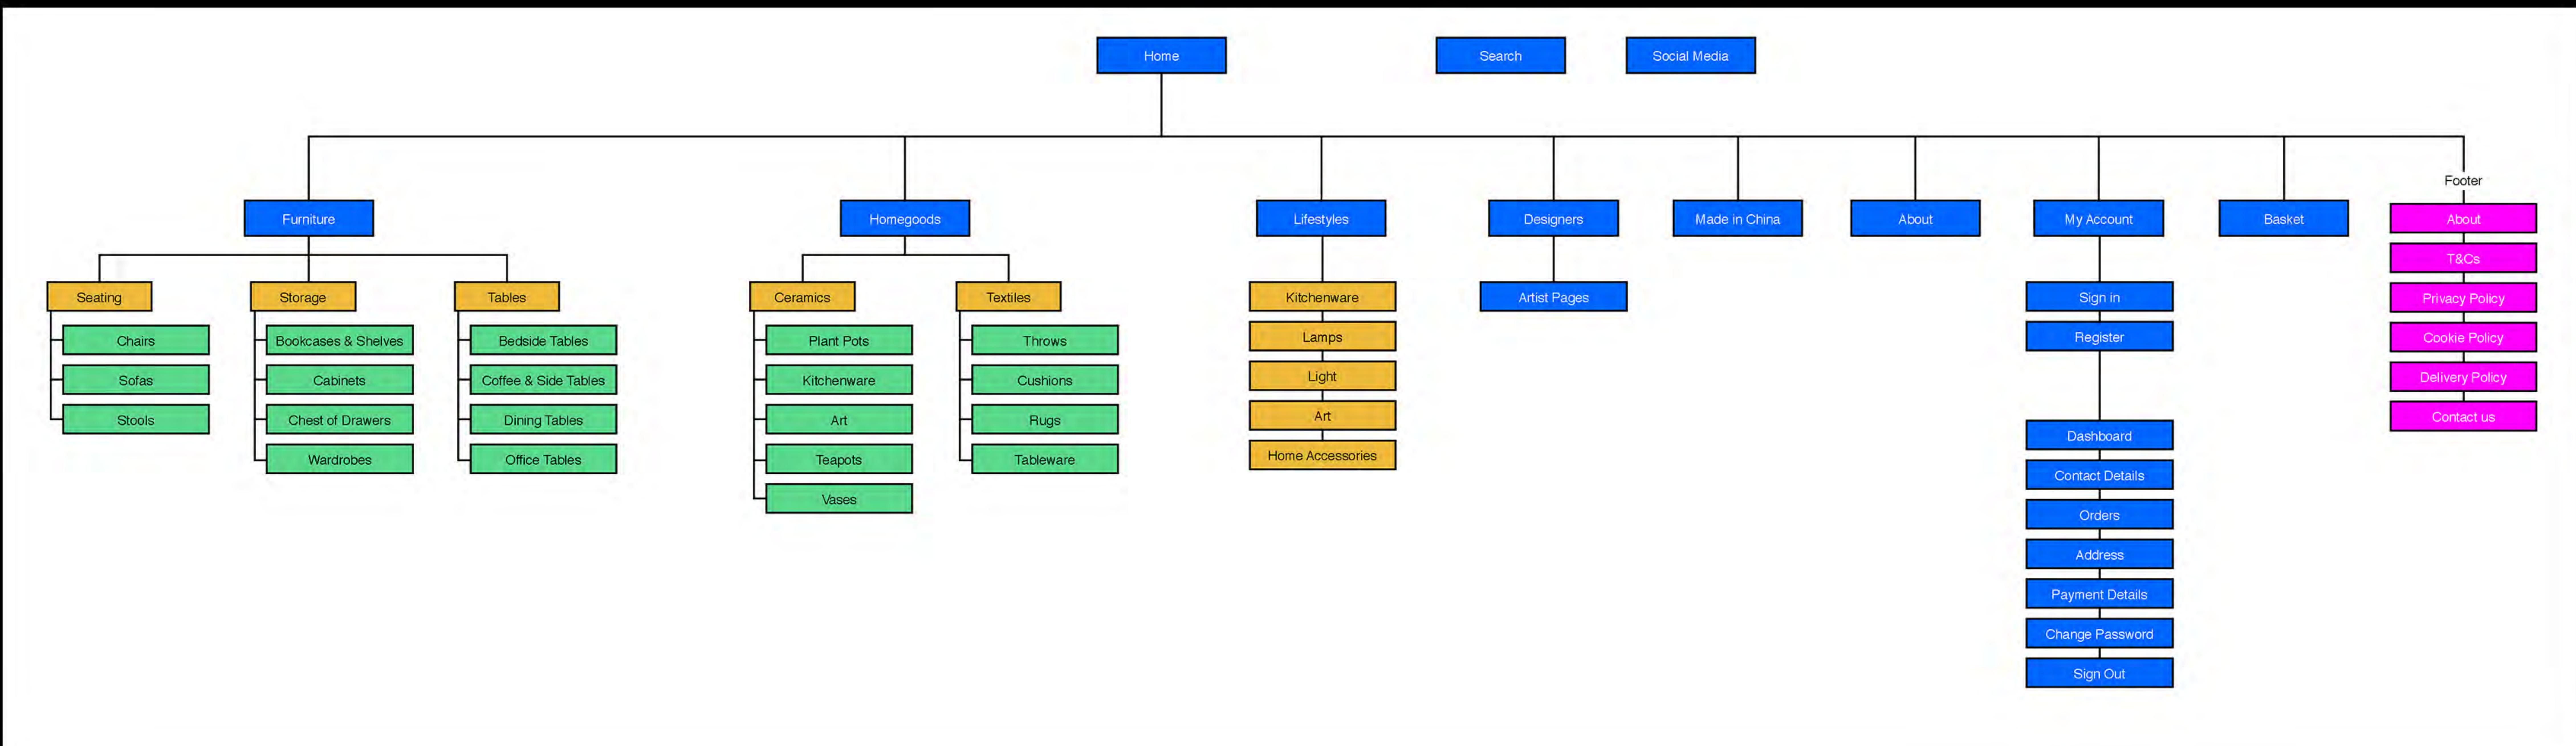

The image displays two side-by-side screenshots of the Korn Ferry 'fuse' intranet system. The left screenshot shows the 'Zurich' office page, which includes a banner, a sidebar with navigation links like 'OFFICES' and 'ADMIN LINKS', and a main content area with sections for 'OFFICE STATUS' (showing it's closed from Feb 26 to Mar 11), 'UPCOMING OFFICE CLOSURES' (listing dates from Apr 8 to May 1), 'EVENTS' (listing a Zurich Office Meeting on Mar 25), 'OUR COMMUNITIES' (listing 'KF Switzerland'), 'IN FOCUS' (listing 'EMEA Travel page', 'Zurich office directions', 'Switzerland phone list', and 'Prime Tower Emergency Plan'), 'NEWS' (listing articles by 'Welcome Annika Reinhardt' and 'KORN FERRY HIS WEEK IN LEADERSHIP'), and 'RECENT DOCUMENTS' (listing 'THE OFFICE' and 'POLICIES & PROCEDURES'). The right screenshot shows the 'People directory' page, which features a search bar, filters for 'Geography', 'Solution Area', 'COE', 'Market', 'Line of Business', and 'Function', and a grid of employee profiles. Each profile card includes a photo, name, title, and a list of contact icons. A total of 10,705 results are shown.

# Living in Design

↗ Branding. UI/UX.

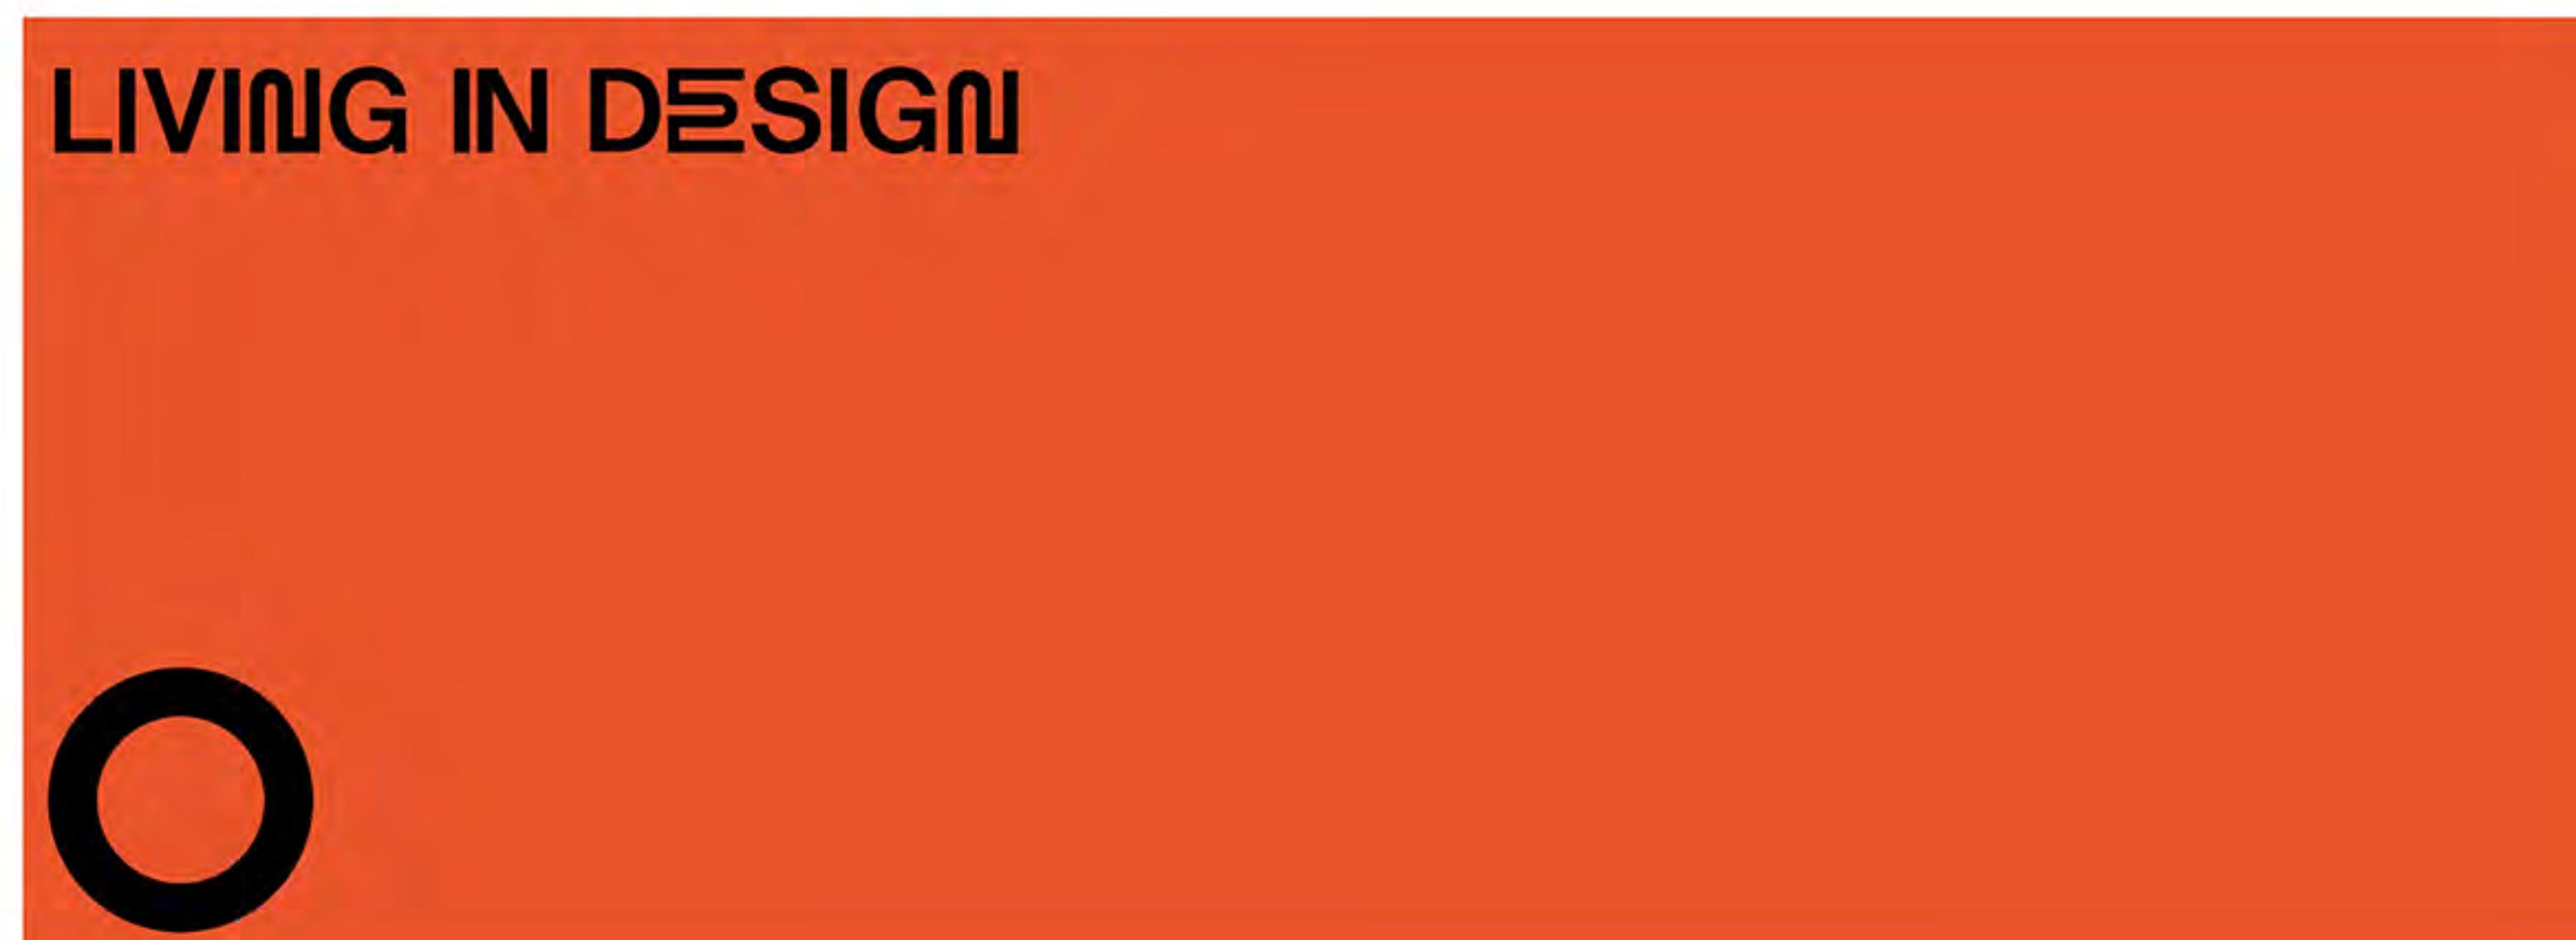

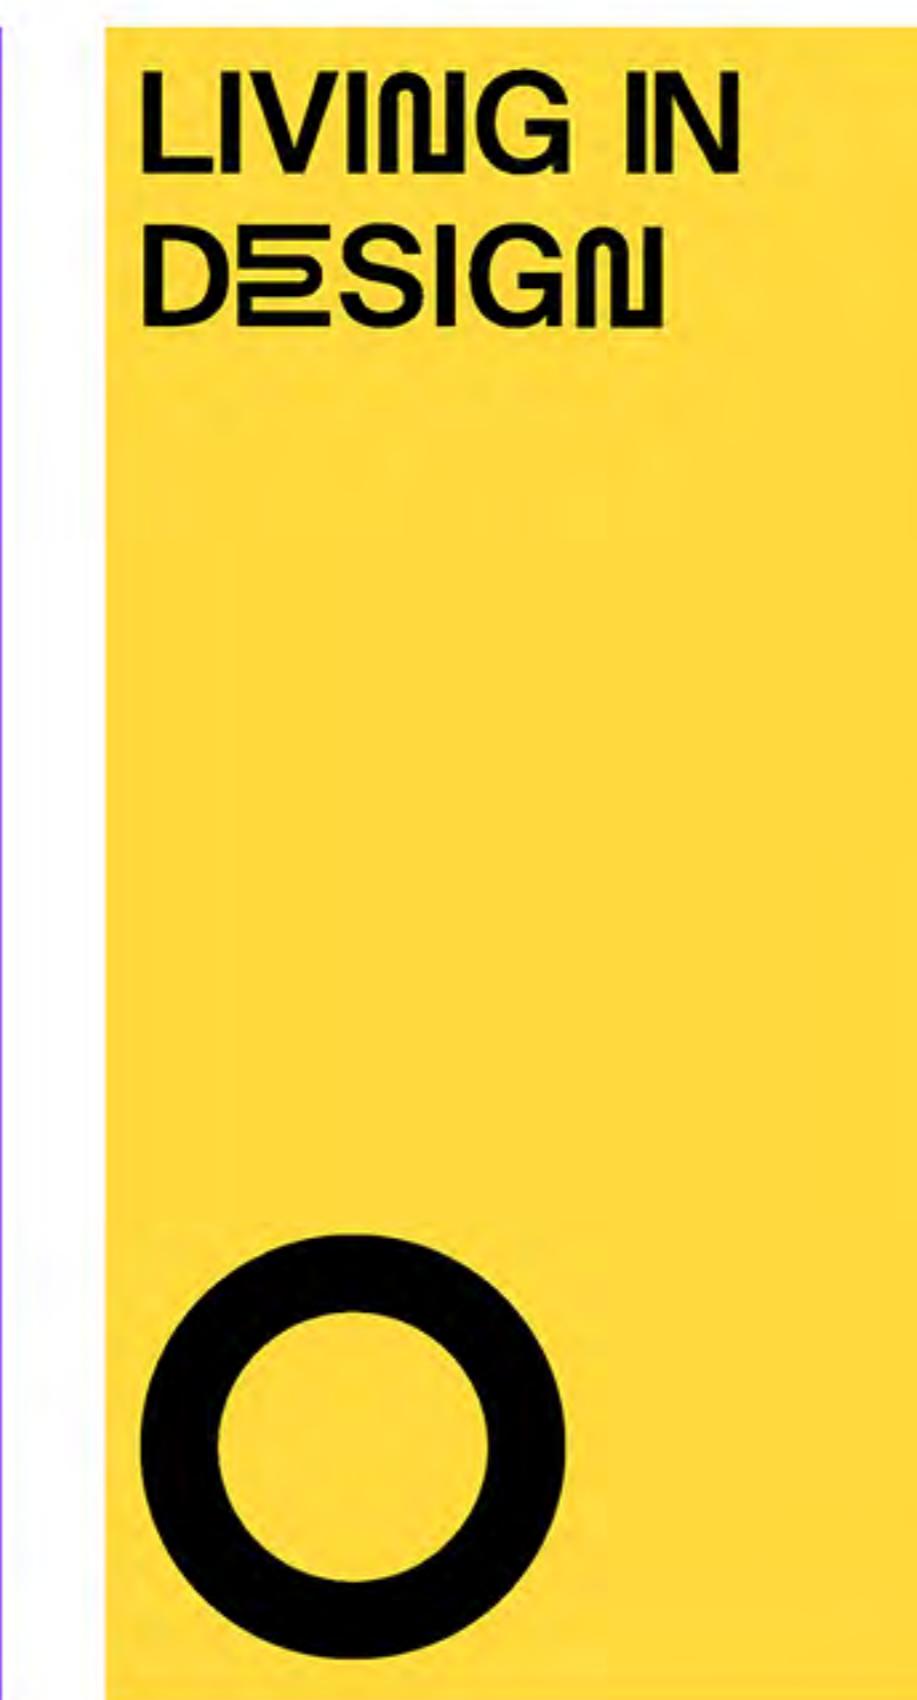

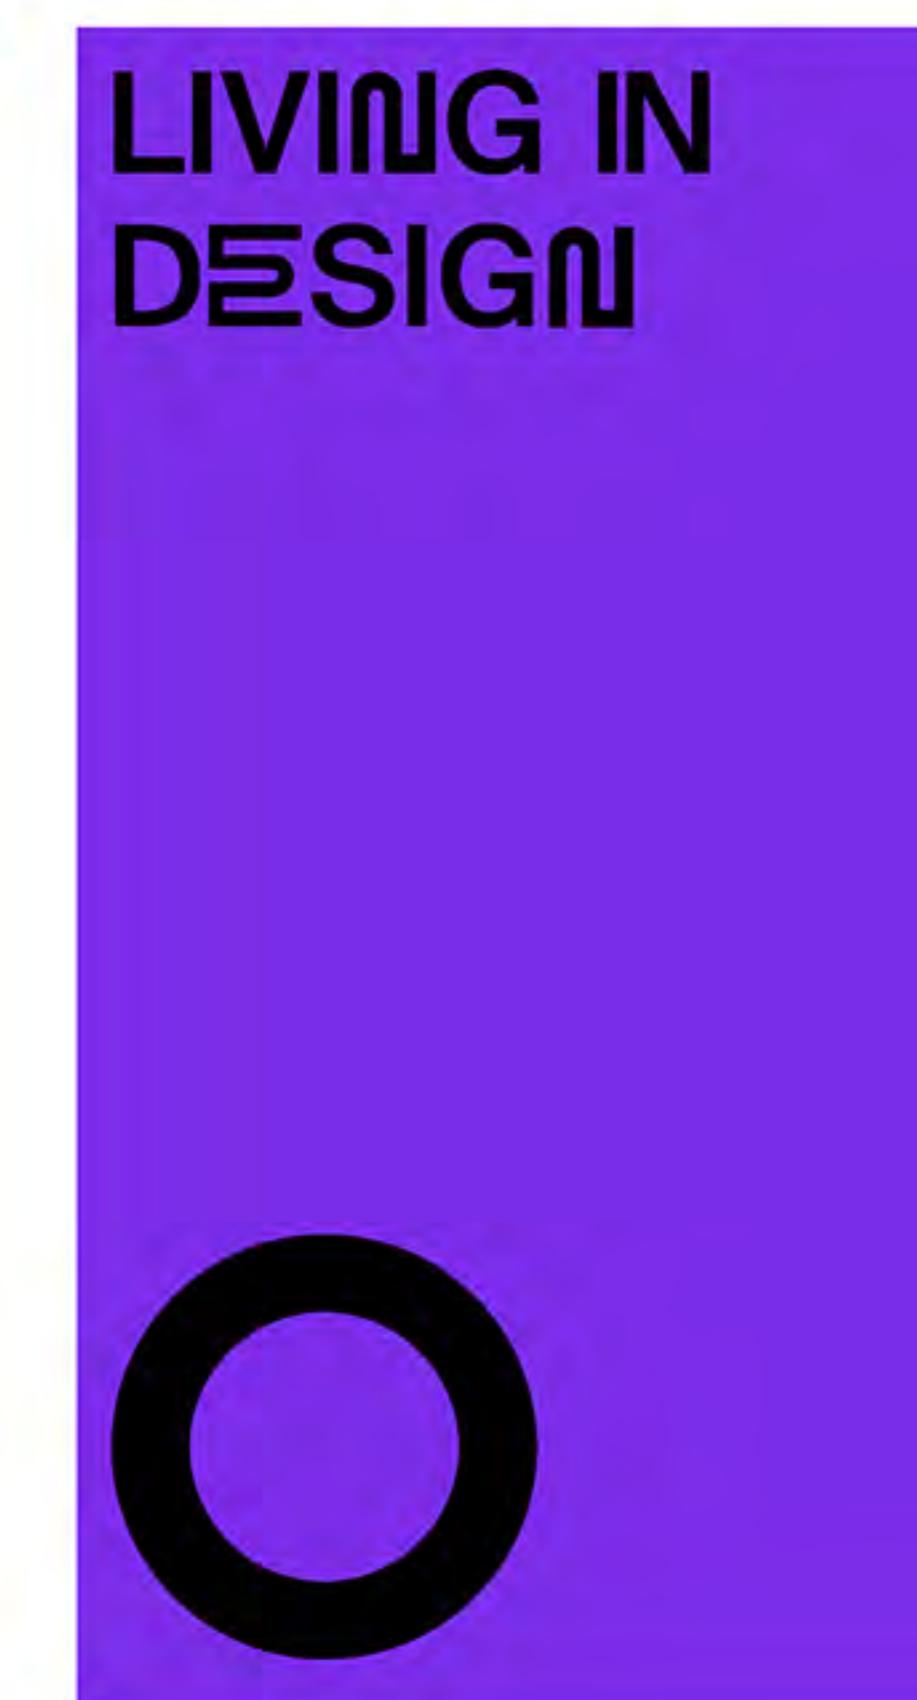

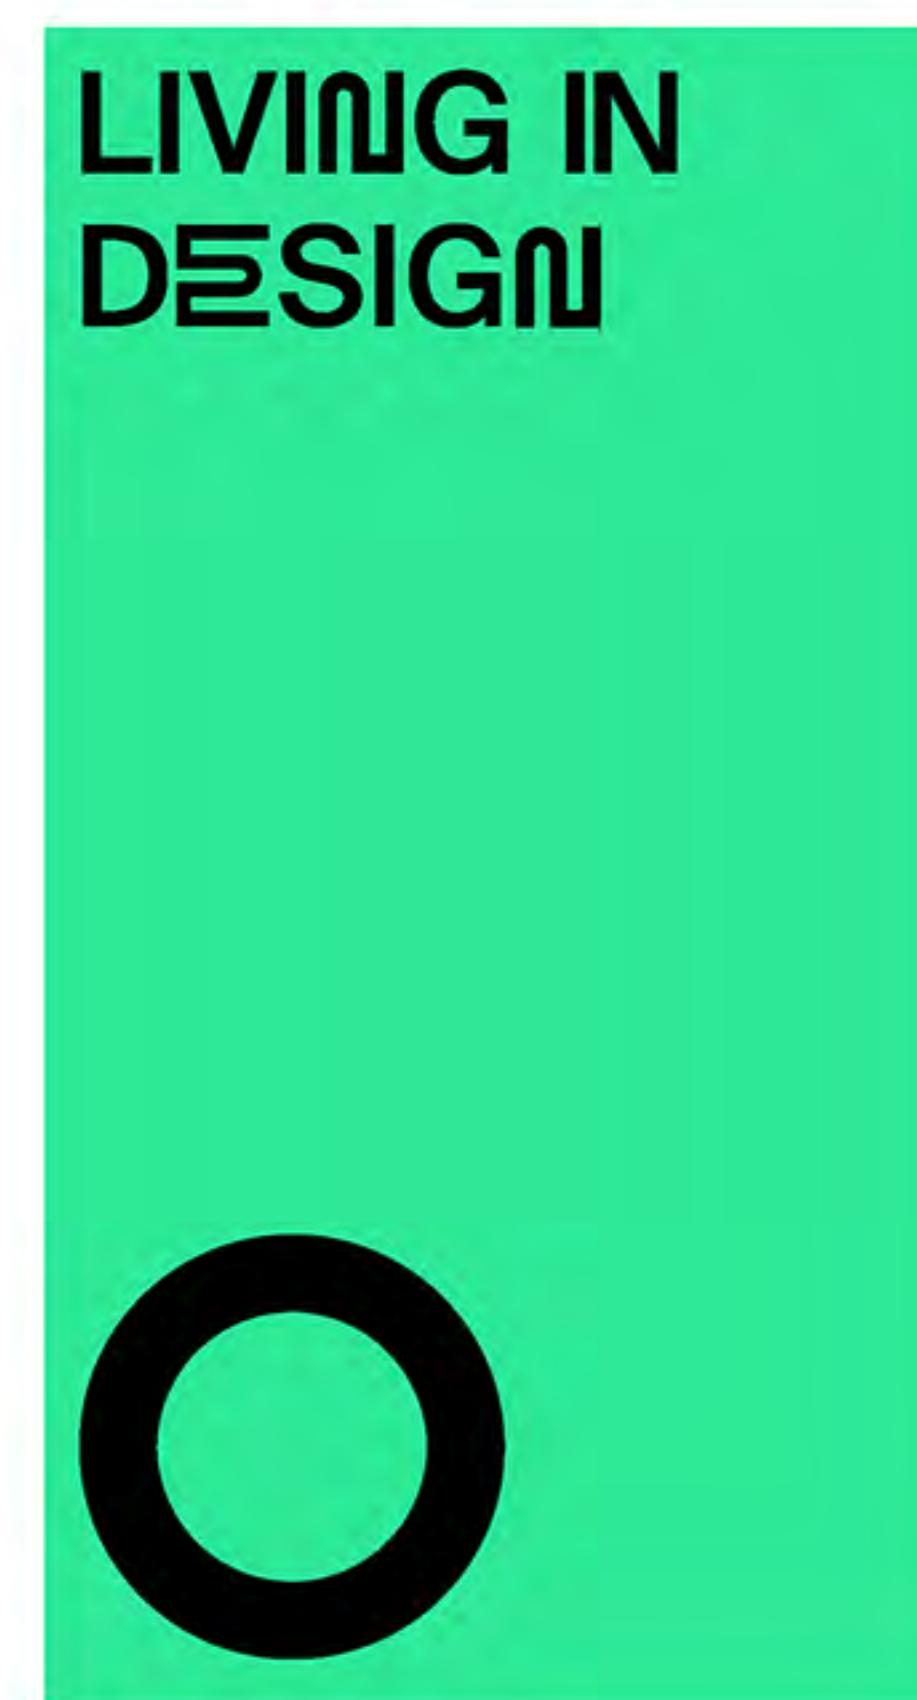

Living in Design is an ecommerce platform which aims to bring high-end, luxury furniture design from Chinese artists in to the western market. The sitemap I developed for the website was relatively simplistic as we were entering the MVP stage of the product, and the focus was primarily on the artists, and the products.

My research at the beginning of this project consisted of exploring how artwork from China historically entered the western market. Through my search in this area, I decided to take the branding in this direction, mirroring the importance of the silk road, and the cultural impact it had on globalisation, and the exchange of ideas.

# Amoscalpel

Amoscalpel is an app designed to help NHS surgeons study custom procedures set up by their mentors. The app enables the mentors to introduce a form of gamification which supports study and allows them to track their students progress.

I mapped out the different user journeys for both the mentors and the students and determined what the core functionality of the app should focus on for the MVP. This was further refined through a series of low-fi wireframes which I discussed with the client. Finally the designs were updated with bespoke UI design, and is currently in development as a working prototype.

# Amoscalpel

↗ UI/UX

The image displays five screenshots of the Amoscalpel mobile application, arranged horizontally. Each screenshot shows a top status bar with signal strength, battery level (100%), and time (9:41 AM). The bottom right corner of each screenshot also shows a 100% battery icon.

- Screenshot 1 (Left): Log In Screen**
  - Header: AMOSCALPEL
  - Form fields: Email Address and Password.
  - Button: Log In (green background).
- Screenshot 2 (Second from Left): Completed Procedures List**
  - Header: Dr. Edward Jenner, Immunologist
  - Section: 15 Available Procedures
  - Section: Completed Procedures
  - Image: Posterior Approach To Hip Anthroplasty (surgical diagram)
  - Image: Posterior Approach To Hip Anthroplasty (surgical diagram)
- Screenshot 3 (Third from Left): Procedure Detail Screen**
  - Header: Posterior Approach To Hip
  - Text: 8/48
  - Image: Posterior Approach To Hip (surgical diagram)
  - Row of icons: Scalpel, Langenbeck, Forceps, Diathermy, Scissors.
  - Text: Task: Using scissors, develop the plane between Piriformis and Gluteus Minimus.
  - Text: Message Mentor: Why are scissors used to develop the plane between Piriformis and the Gluteus Minimus? Wouldn't it be better to do something else?
- Screenshot 4 (Fourth from Left): Message Thread**
  - Text: Morbi viverra elit orci 15:04
  - Text: Lorem Ipsum dolor sit amet 15:13
  - Text: It's because of this, that, and the other reason too. 15:02
- Screenshot 5 (Right): Chat Input**
  - Text input field: Type a message...
  - Text: Send

# Amoscalpel

↗ UI/UX

The image displays four screenshots of the Amoscalpel mobile application interface, arranged horizontally. Each screenshot shows a different screen of the app.

**Screenshot 1: Edit Task**  
This screen shows a medical illustration of a hip joint during surgery. Below the illustration are five icons representing surgical instruments: Scalpel, Langenbeck, Forceps, Diathermy, and Scissors. A text area contains the task description: "Using scissors, develop the plane between Piriformis and Gluteus Minimus". A green "Save" button is visible. At the bottom is a virtual keyboard.

**Screenshot 2: Ben Browning Results**  
This screen shows results for the "Posterior Approach To Hip" procedure. It has two tabs: "Attempts" (selected) and "Confidence".

- All Attempts:**
  - Total Attempts: 9
  - Completed Attempts: 7
  - Average Errors per Step: 0.21
  - Average Time per Step: 27s
  - Average Bonus Points: 3
- Most Recent Attempt:**
  - Average Time per Step: 24s
  - Completed: Yes

**Screenshot 3: Ben Browning Results**  
This screen shows results for the "Posterior Approach To Hip" procedure. It has two tabs: "Attempts" and "Confidence".

- Trainee can perform the procedure with you present:** Highly Likely (rating 7)
- Trainee can perform the procedure without you present:** Highly Likely (rating 7)

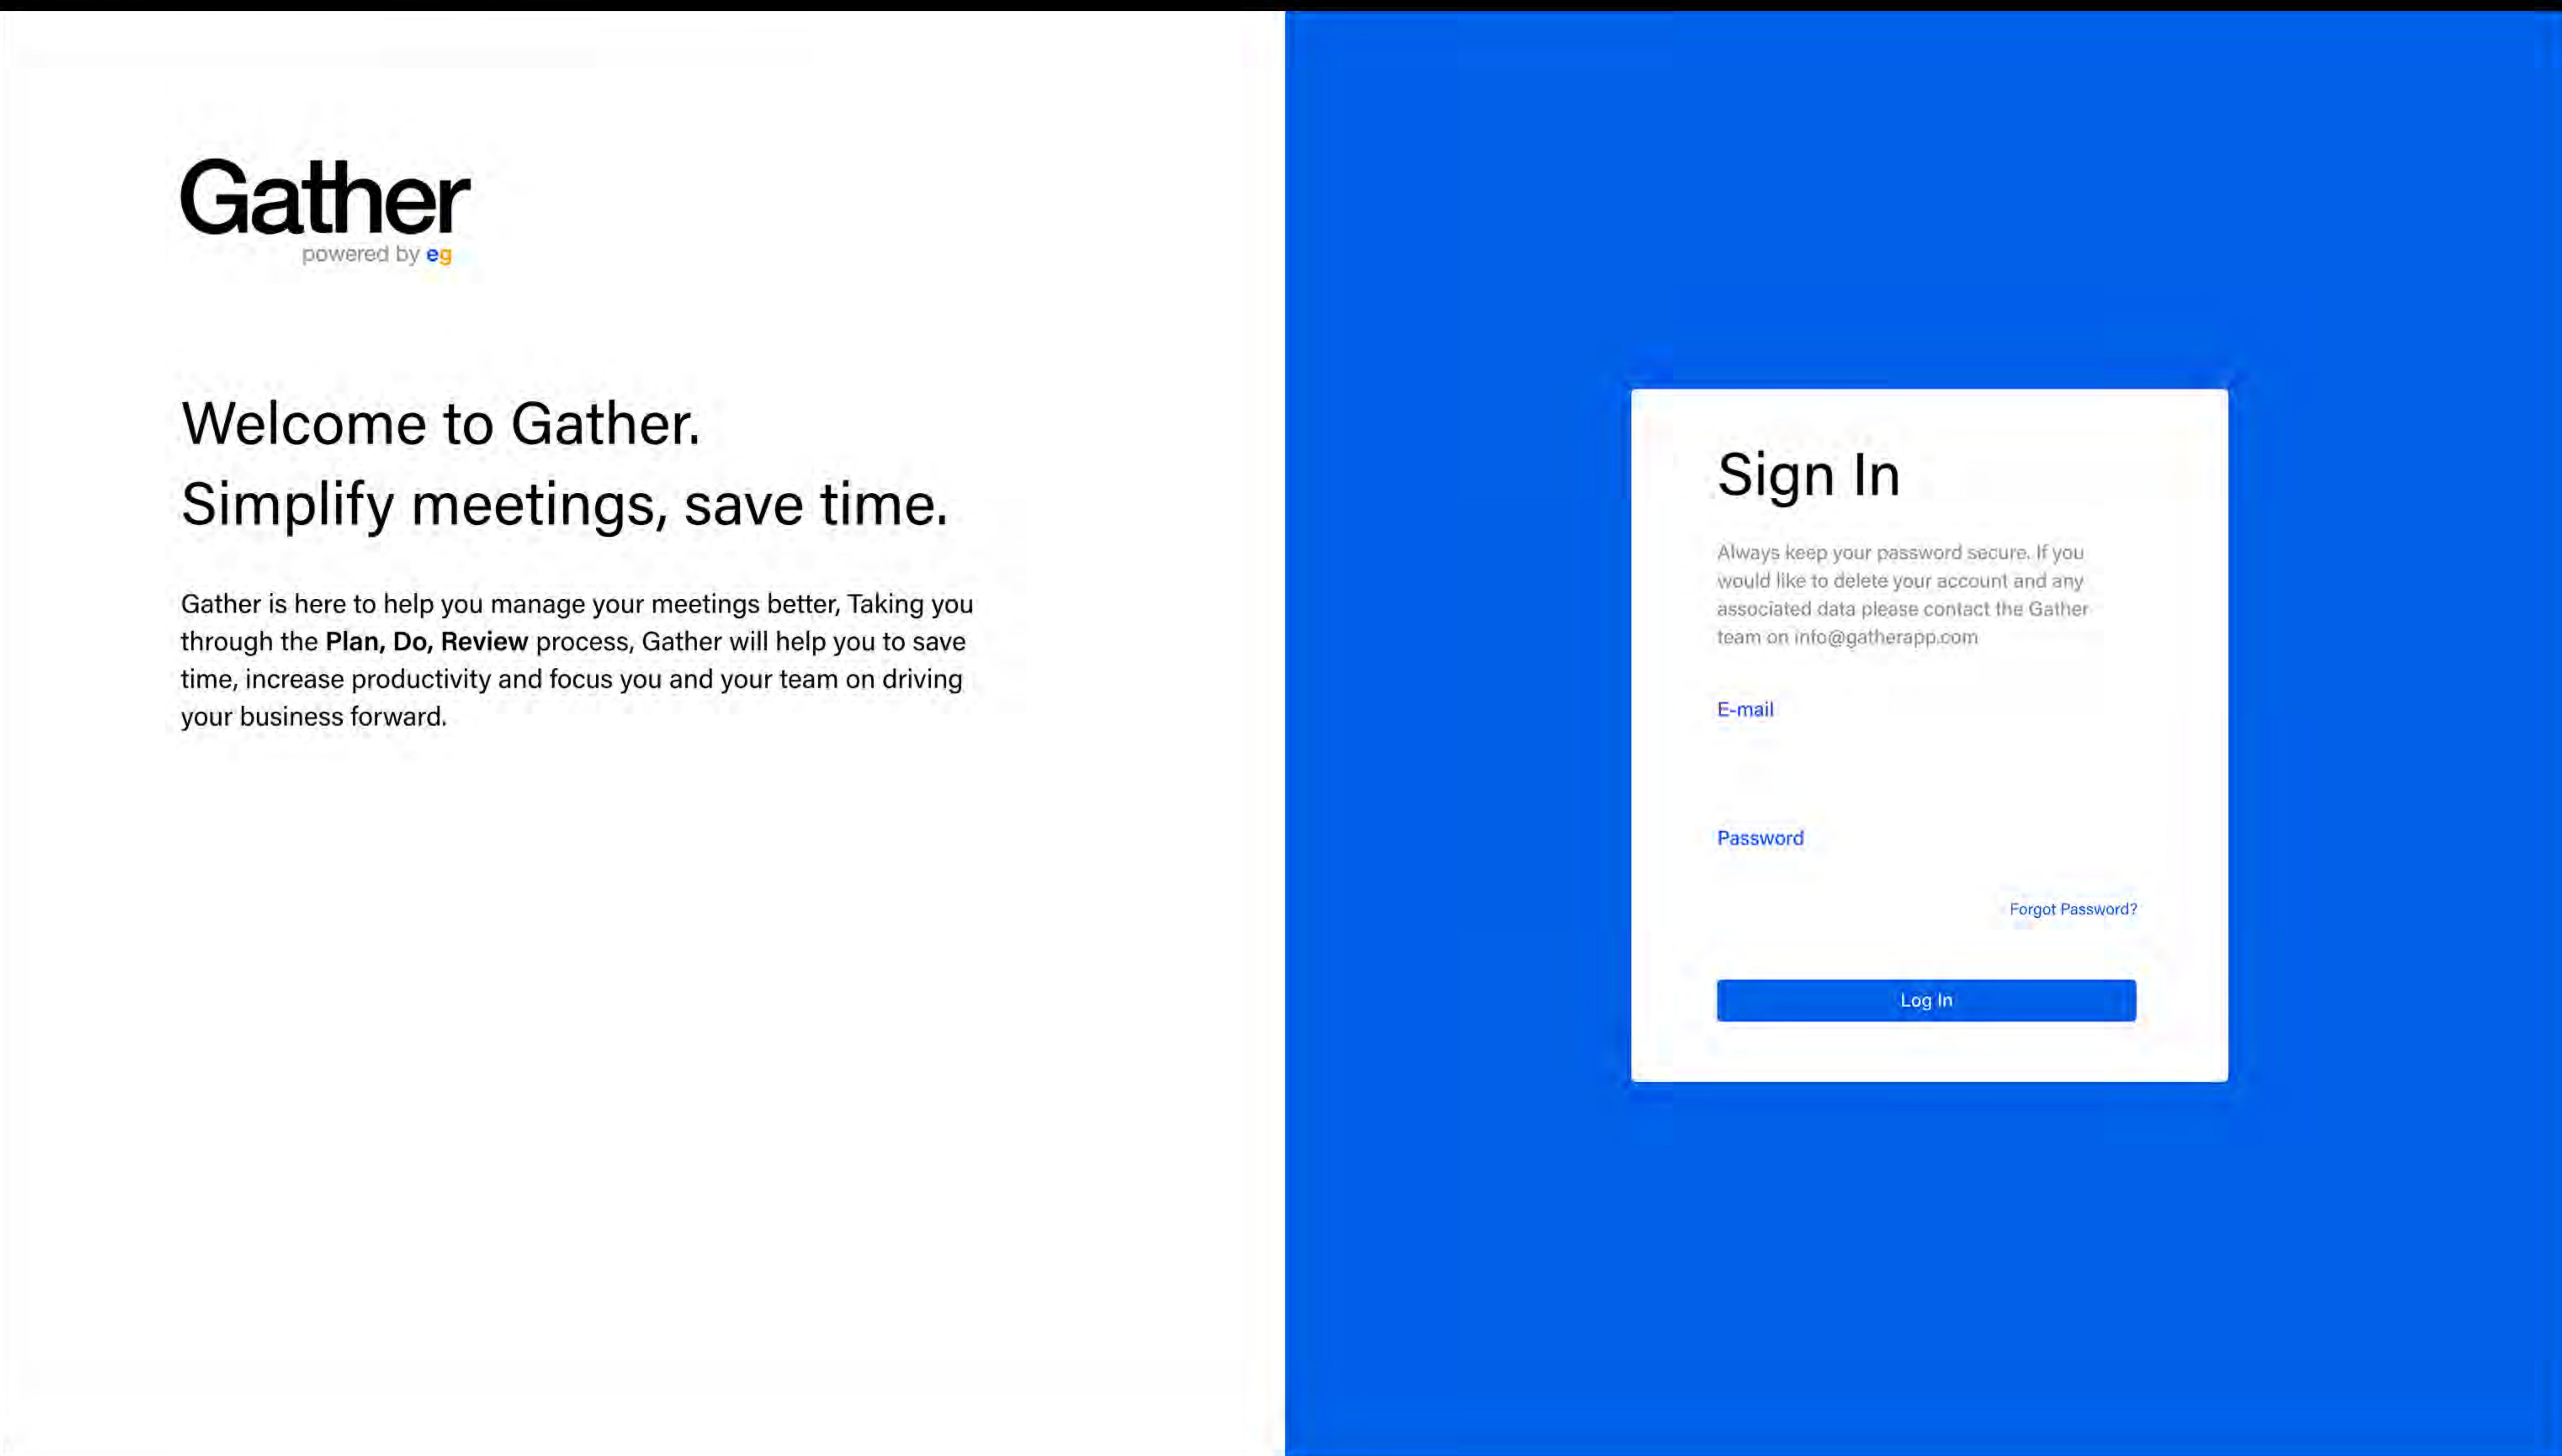

**Screenshot 4: Ben Browning Results**  
This screen shows survey results for the "Posterior Approach To Hip" procedure.

Survey Result	Value
Number of times performed	11
Likeliness to recommend	8 ●
Confidence with mentor	7 ●
Confidence without mentor	5 ●
Confidence when tired or stressed	4 ●
Confidence under pressure	2 ●

# Egremont Group

Egremont Group is an international management consultancy group. The Gather app is designed to increase meeting productivity using Egremont Group's unique approach to meeting management. In order to guide the user through this process, I designed a method of moving the user through the app, encouraging them to take Egremont's desired approach.

This project is currently in its final stages of development and is being beta tested by a number of their clients, including Walgreens and Snapfish.

- Telephone Triage
- Work Station Assessments (WSAs)
- National Network of Physiotherapy Treatment
- Functional Restoration Programs (FRP)
- Occupational Physiotherapy

Musculoskeletal (MSK) Conditions (e.g. back pain, neck pain) have consistently been, along with mental illness, the most commonly reported and costly type of work-related illness since records began.

Wouldn't it make great business sense to have an effective strategy in place to manage MSK Conditions, so that you save your organisation money, and are able to implement a solution that demonstrates a sound return on investment? We provide complete return to work solutions for MSK Conditions which blend seamlessly with any Occupational Health Service. We can provide you with a specialist service in assessing, treating and rehabilitating Employees back to work and function through a bio-psychosocial approach, in the safest and quickest possible time.

We work with public and private sector organisations to reduce their musculoskeletal (MSK) workplace absence by helping their Employee's to be healthier, fitter and more productive.

You can be assured of a cost effective and high-quality service, and we will work flexibly with you to ensure that we provide a service which matches your needs.

**Telephone Triage**

Vita Health Group uses the bio-psychosocial model to rehabilitation, using a systematic stepped approach which includes prevention, early advice and treatment.

We provide clients with a helpline and telephone triage service to ensure fast access to clinically appropriate advice and treatment. The triage call is undertaken by a chartered physiotherapist who identifies the appropriate treatment pathway to improve and restore wellness for work and life.

Evidence demonstrates that self-management for certain conditions can be as effective as face to face physiotherapy and often more effective and convenient for the patient.

If the triage physiotherapist identifies that guided self-management is appropriate, using app-based exercise prescription software; a tailored information pack & exercise programme may be provided. The triage physiotherapist manages the journey and arranges follow up calls to check on progress.

If the triage physiotherapist identifies face to face treatment as the appropriate pathway you will be referred to a local and convenient clinic. We currently provide national coverage for physiotherapy treatment via our national centres and network of quality assured clinics.

**Benefit to Telephone Triage**

- Rapid access to evidence-based telephone consultation with a senior Physiotherapist
- To receive treatment based on the latest evidence-based guidelines
- To know who to contact and how, throughout your treatment
- To access a service that operates six days a week
- Our approach involves self-management using app-based exercise programs. There is full follow up and monitoring with onward referral if required
- Up to 20% of triage clients are able to self-manage under our program

**Mental Health** | Private Services

**Accessing the Service**

"Access has never been so easy, I referred myself in 5 minutes and received a call to book my appointment the next day"

To register your referral, we will need your name, date of birth, contact details including postal address, and name of the GP surgery you are registered with.

If you are a Healthcare professional and wish to make a referral on behalf of your patient, please [click here](#)

**How to access the service online**

We've made sure the form is easy to complete and should only take you about 5 minutes.

[Complete the online self-referral form](#)

**What next?**

We will then book you in for a telephone assessment.

Before your telephone assessment, we will send you (by email or post) questionnaires to complete, please try to have these completed before your appointment, this will enable the therapist to get the most out of the appointment.

Telephone assessments usually take 30 minutes, please try to find a quiet, private and comfortable place when our therapist calls you.

**How to access the service by Phone**

You can call us on XXX between the hours of 8am-8pm Mon-Friday and 9am-12.30pm Saturday. We will take some details from you and arrange an appointment.

We are available our of hours, where you will speak to a counsellor who can provide you with immediate emotional support and take referral information for you.

**How to access the service by Clinic**

If you would prefer to see us face to face, you can drop into one of our clinics for information about the service or an immediate assessment.

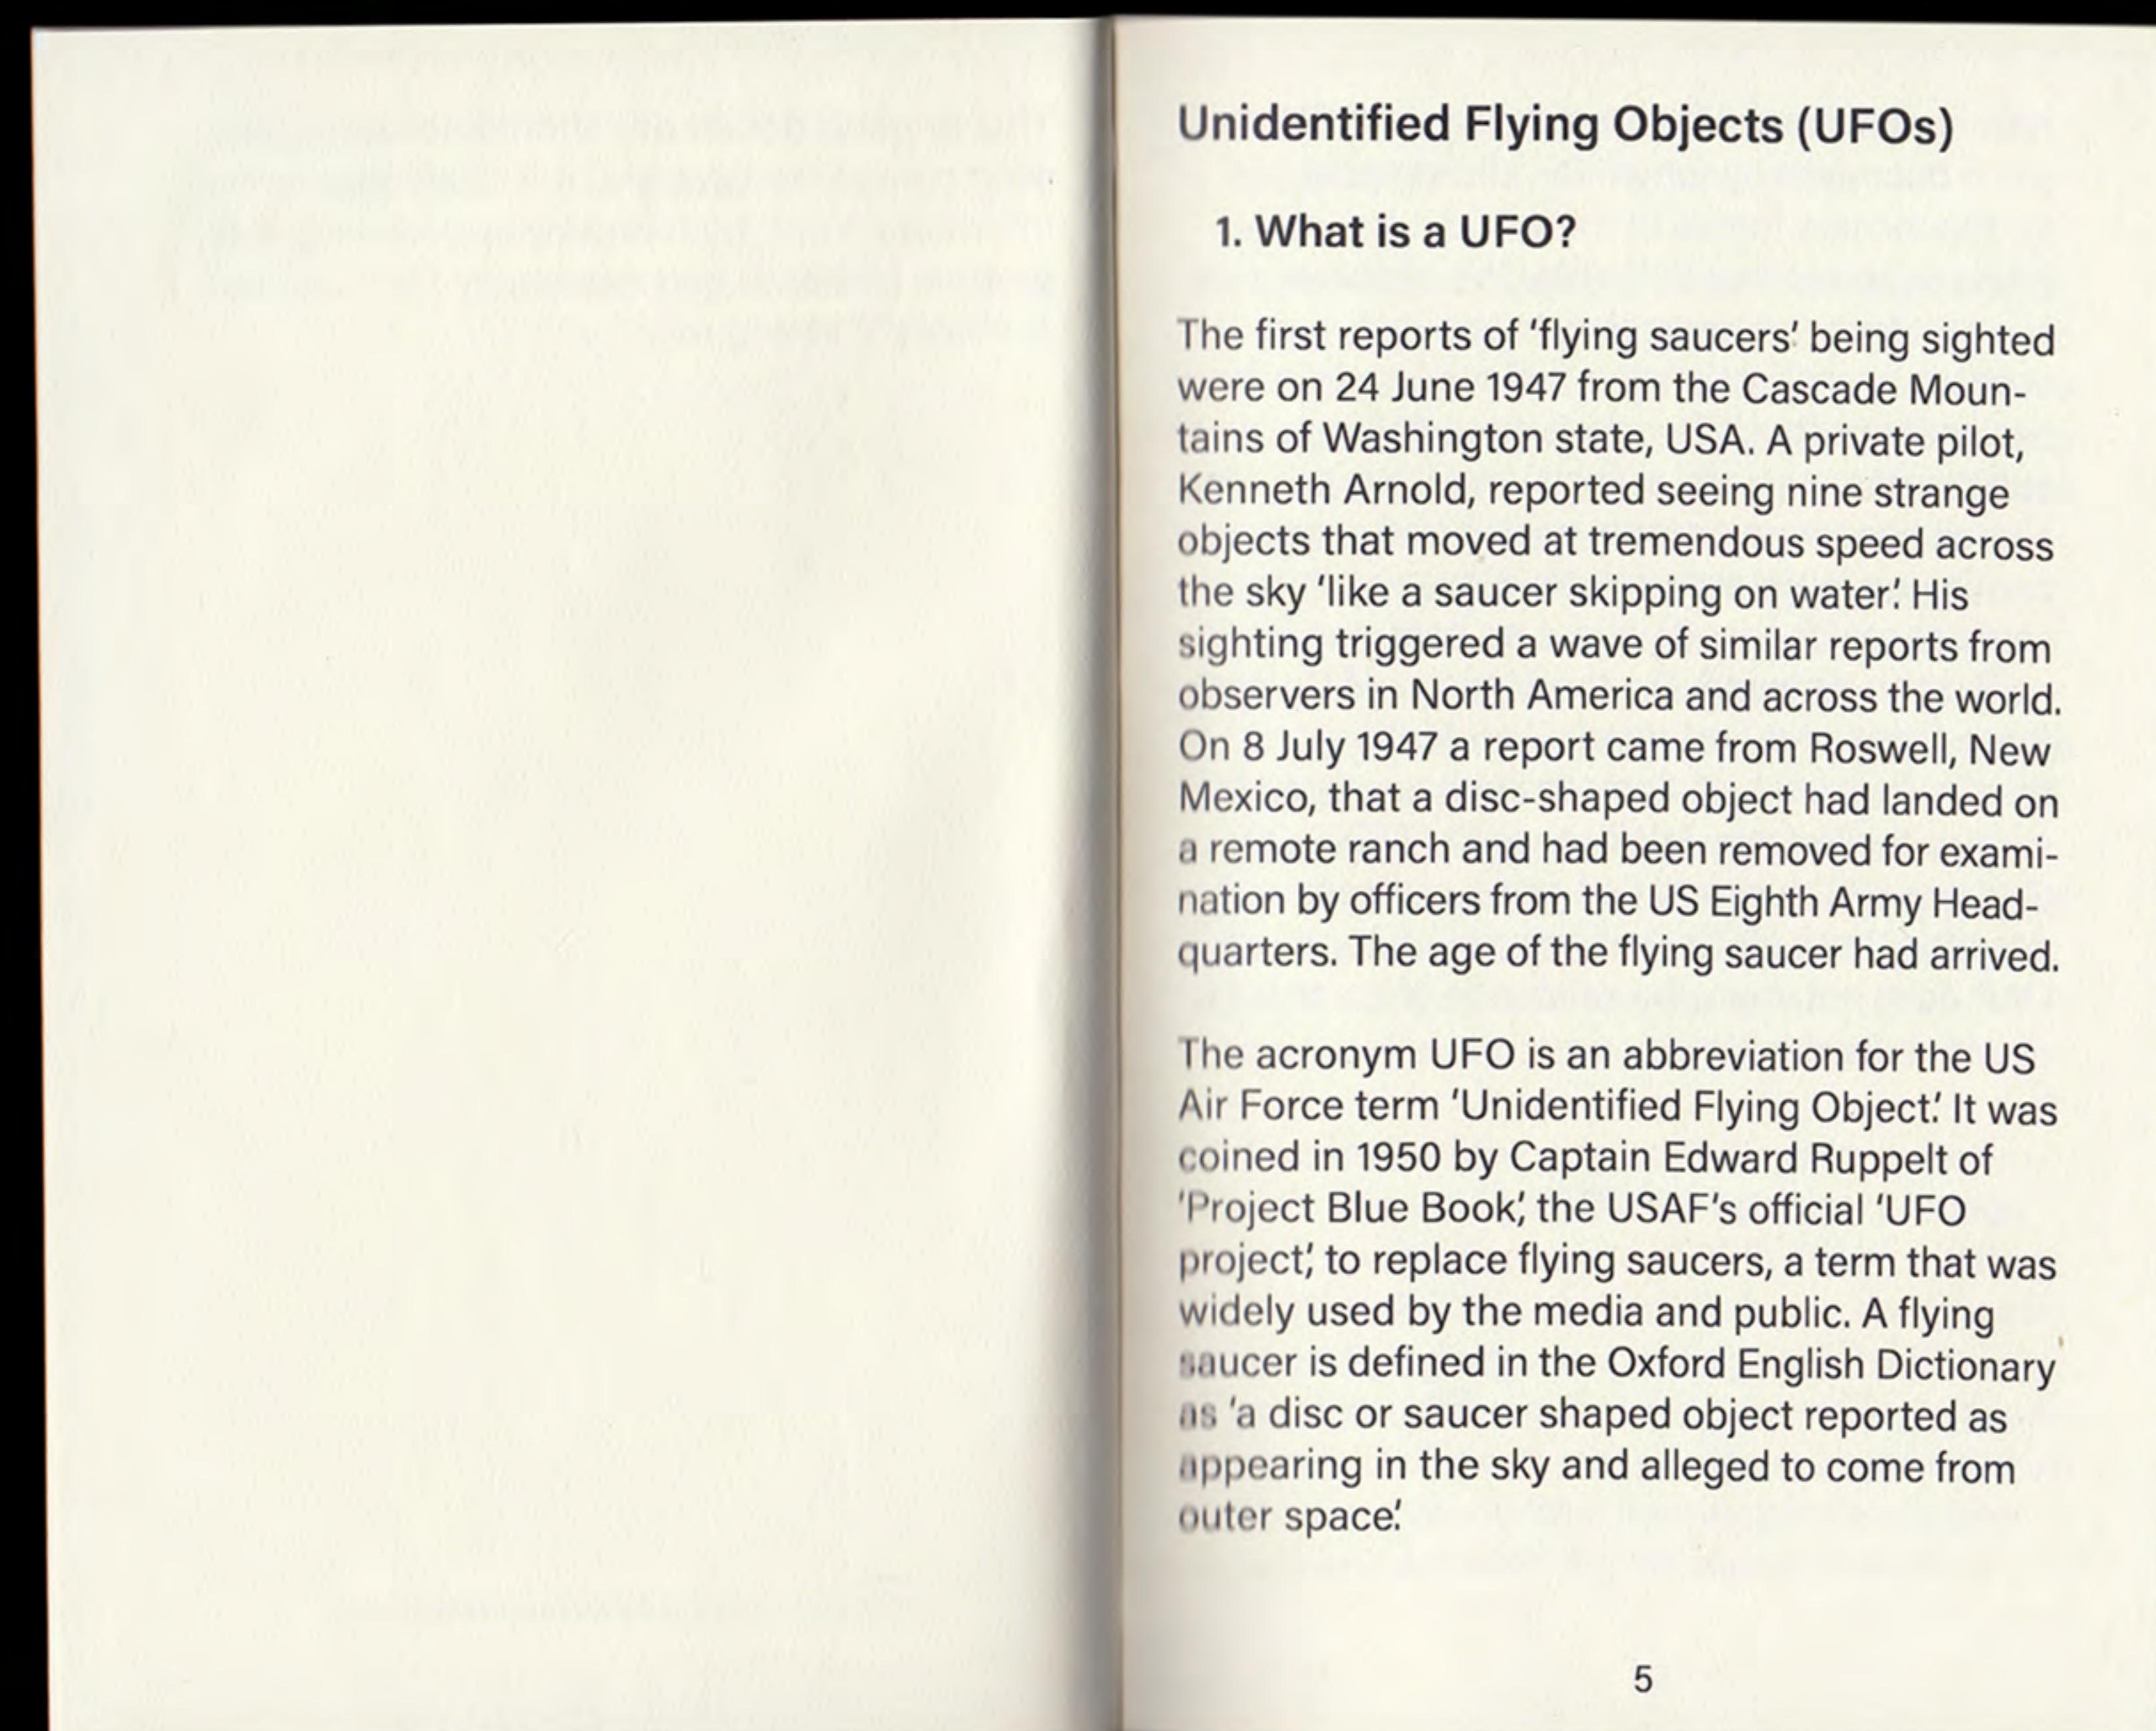

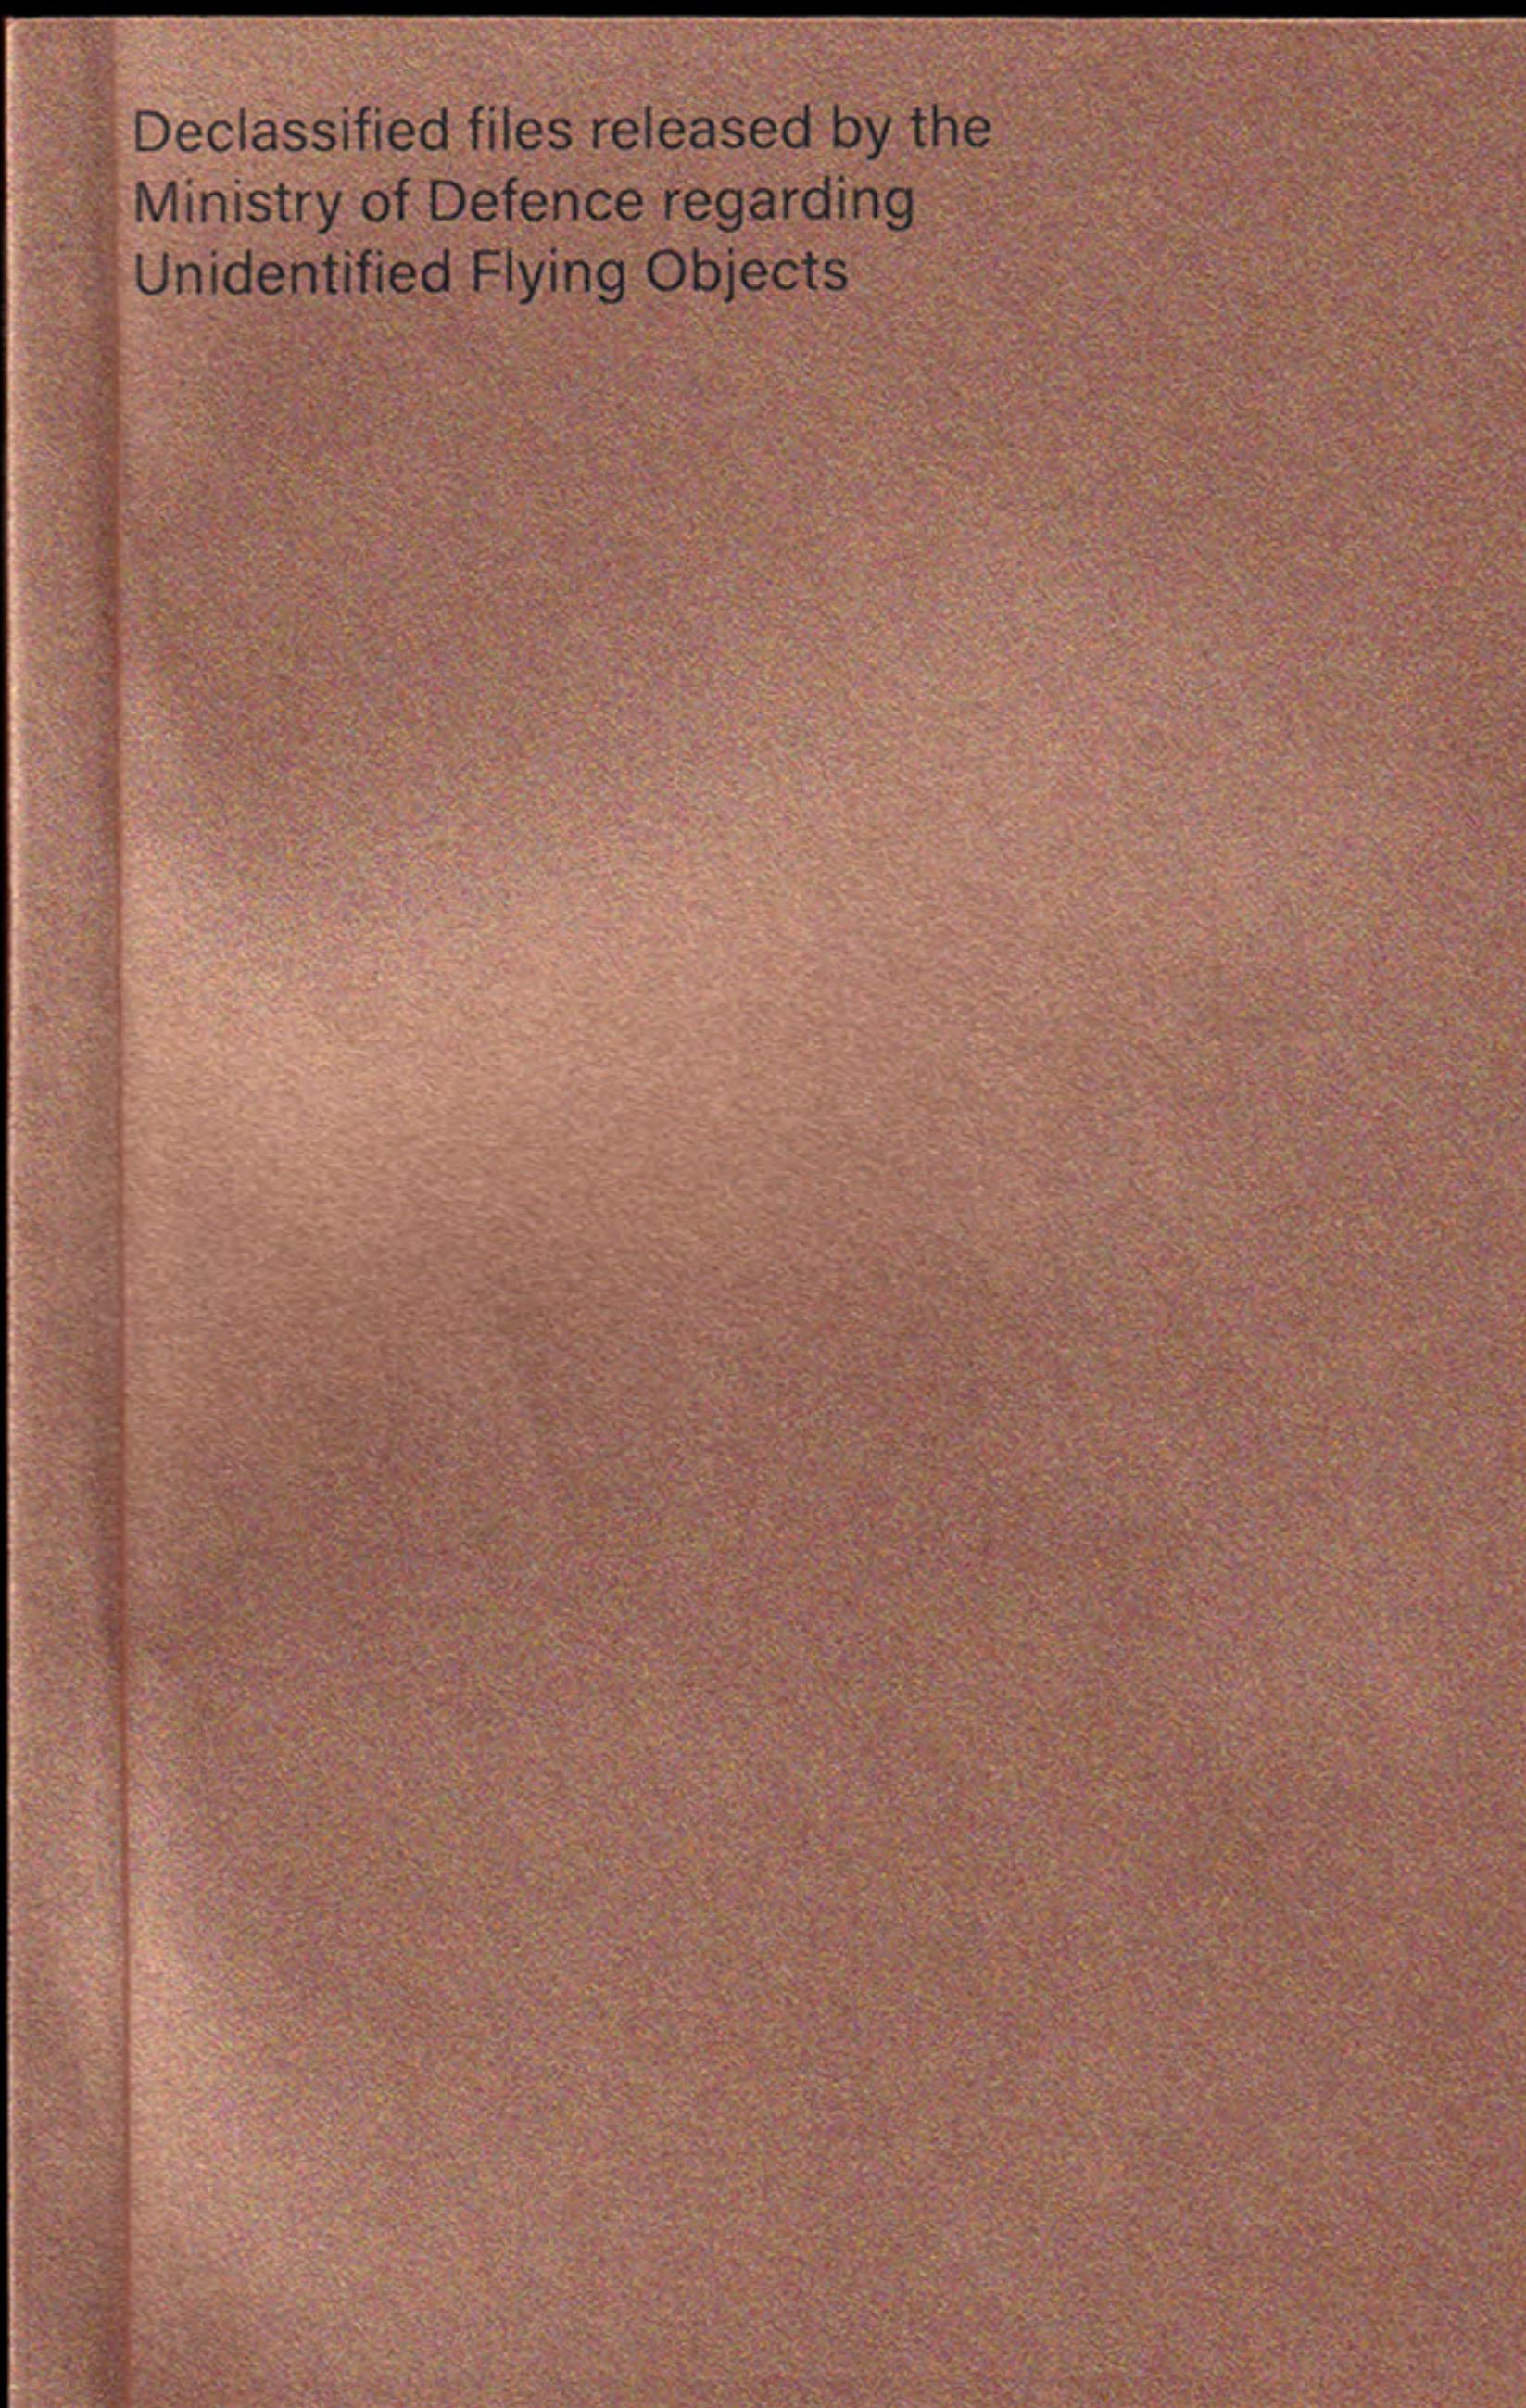

Our drop in clinics are located at:

Beckenham - Beacon 020 8778 9050	Beckenham - BMI The Sloane 020 8778 9050

# Ministry of Defence Archive Research

# ↗ Typography. Layout Design.

# Declassified files released by the Ministry of Defence regarding Unidentified Flying Objects

- The surviving records generally consist of four categories of material:

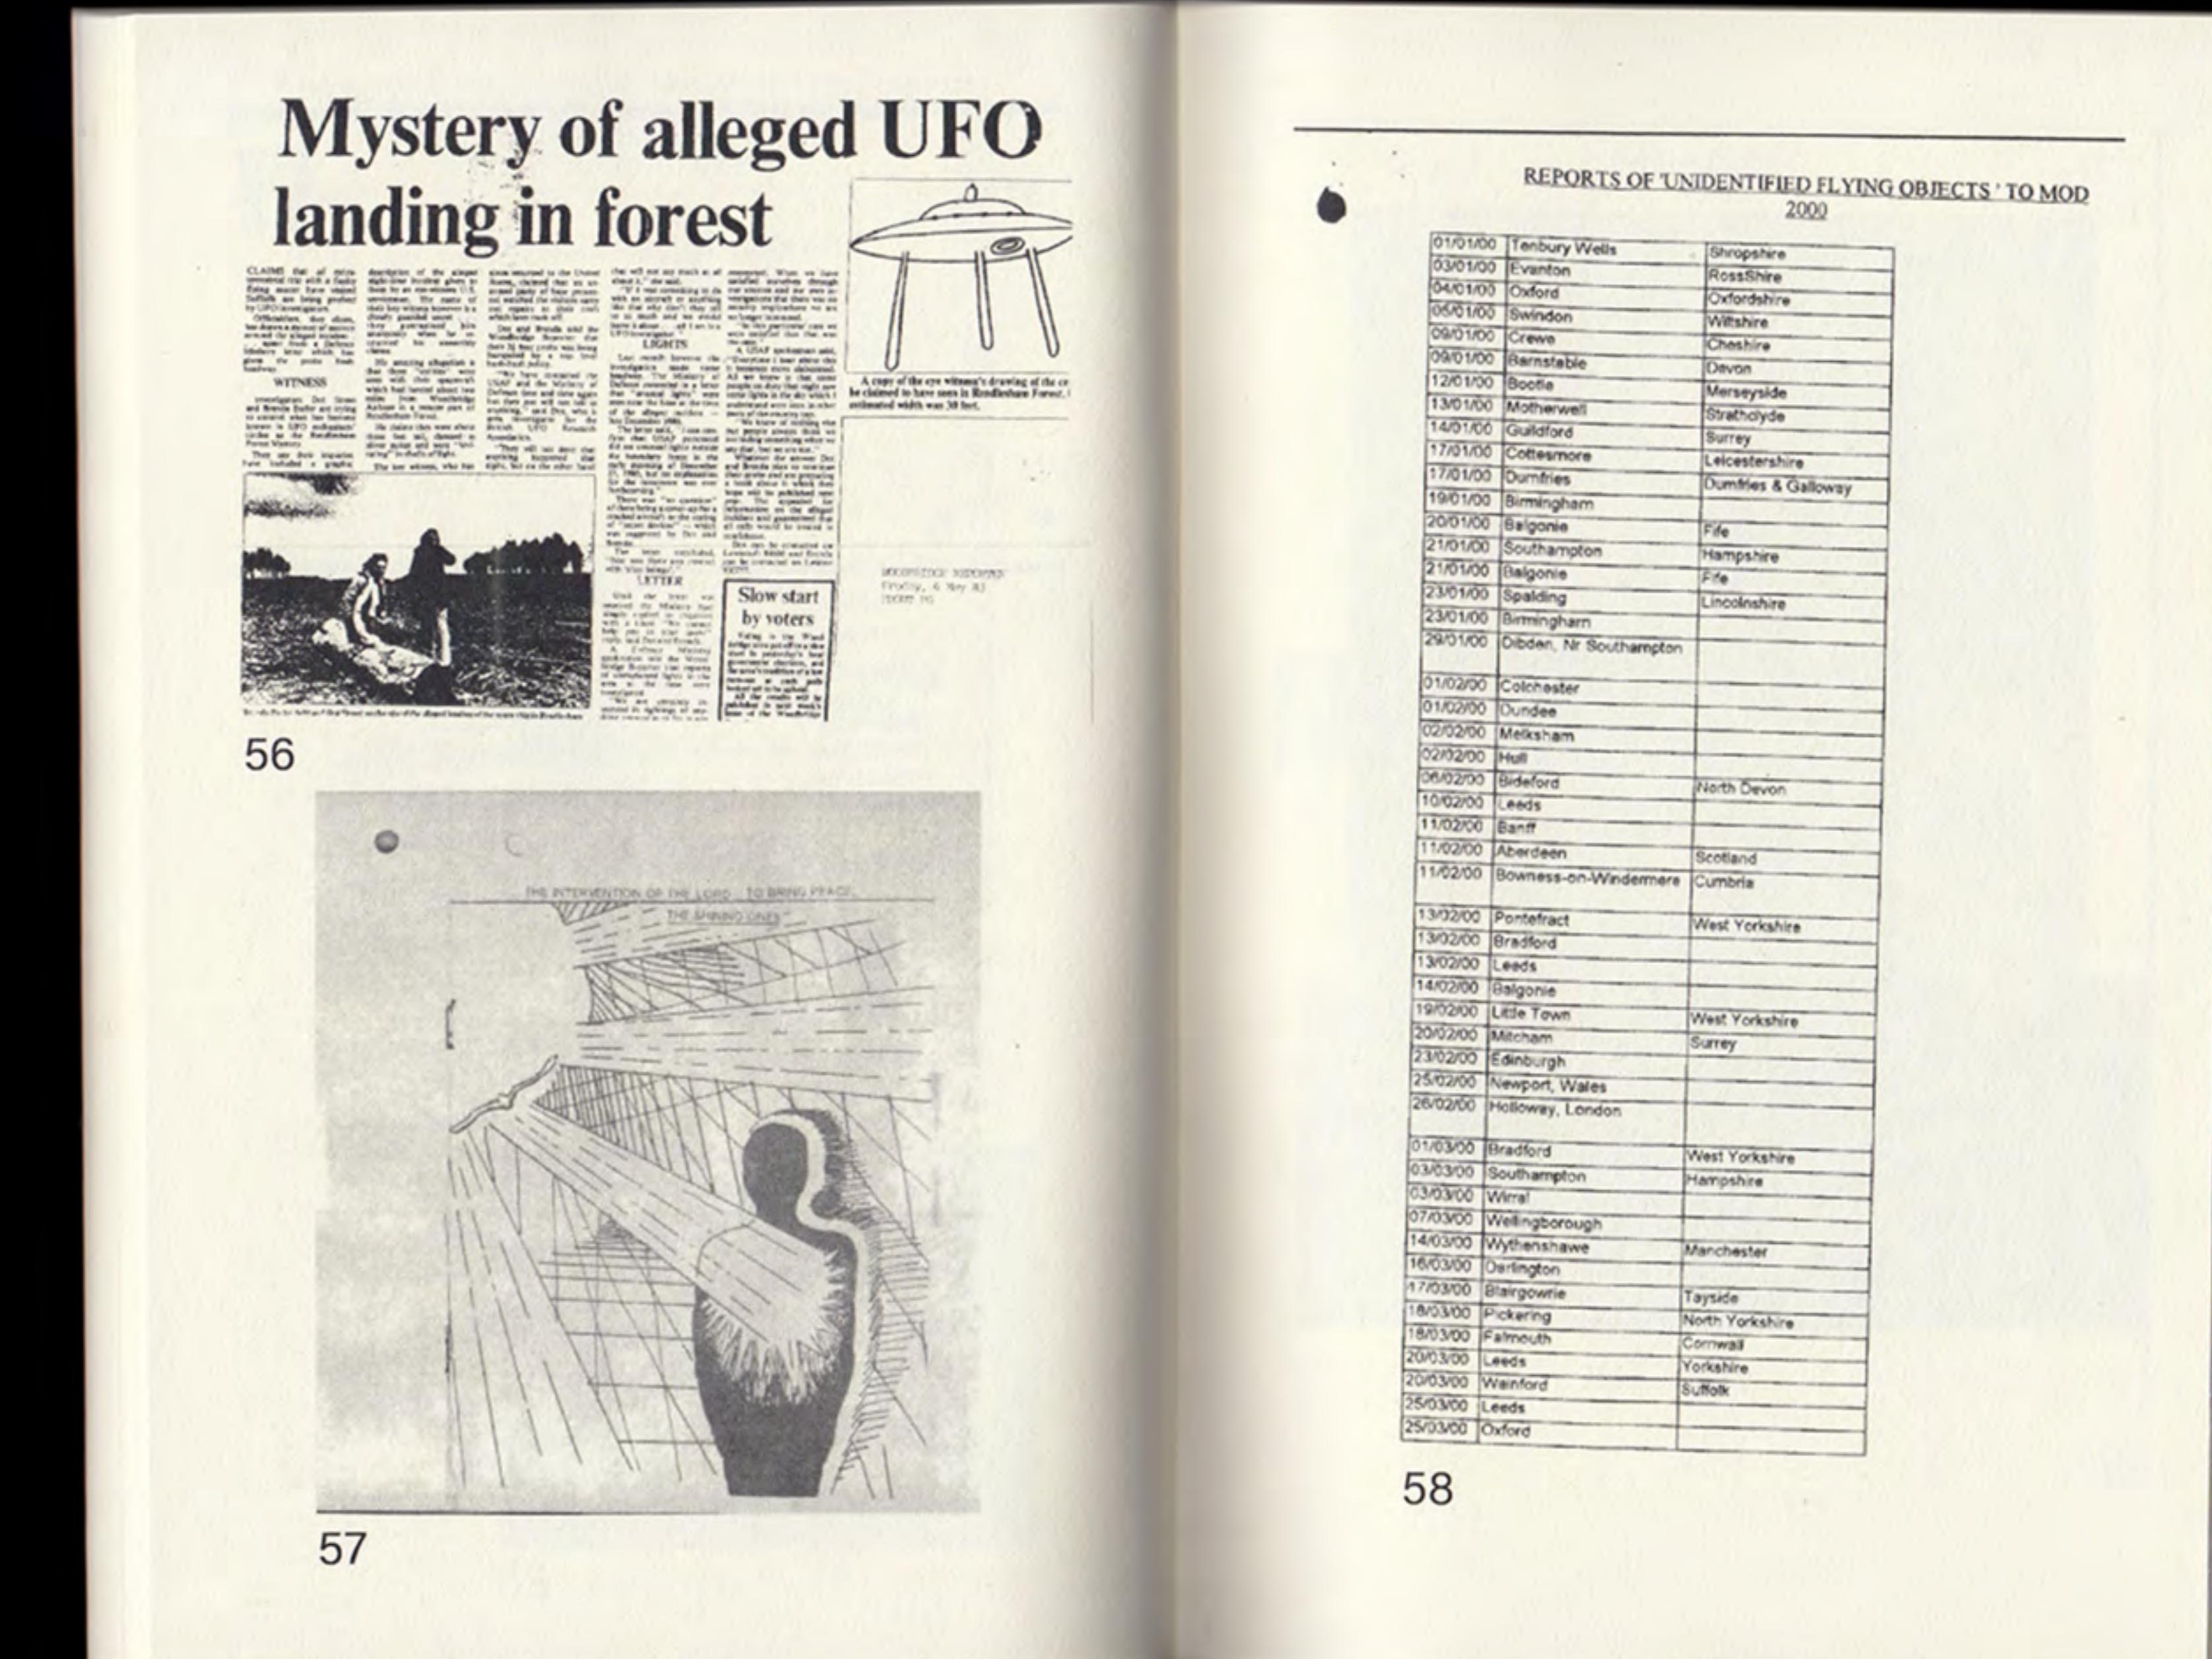

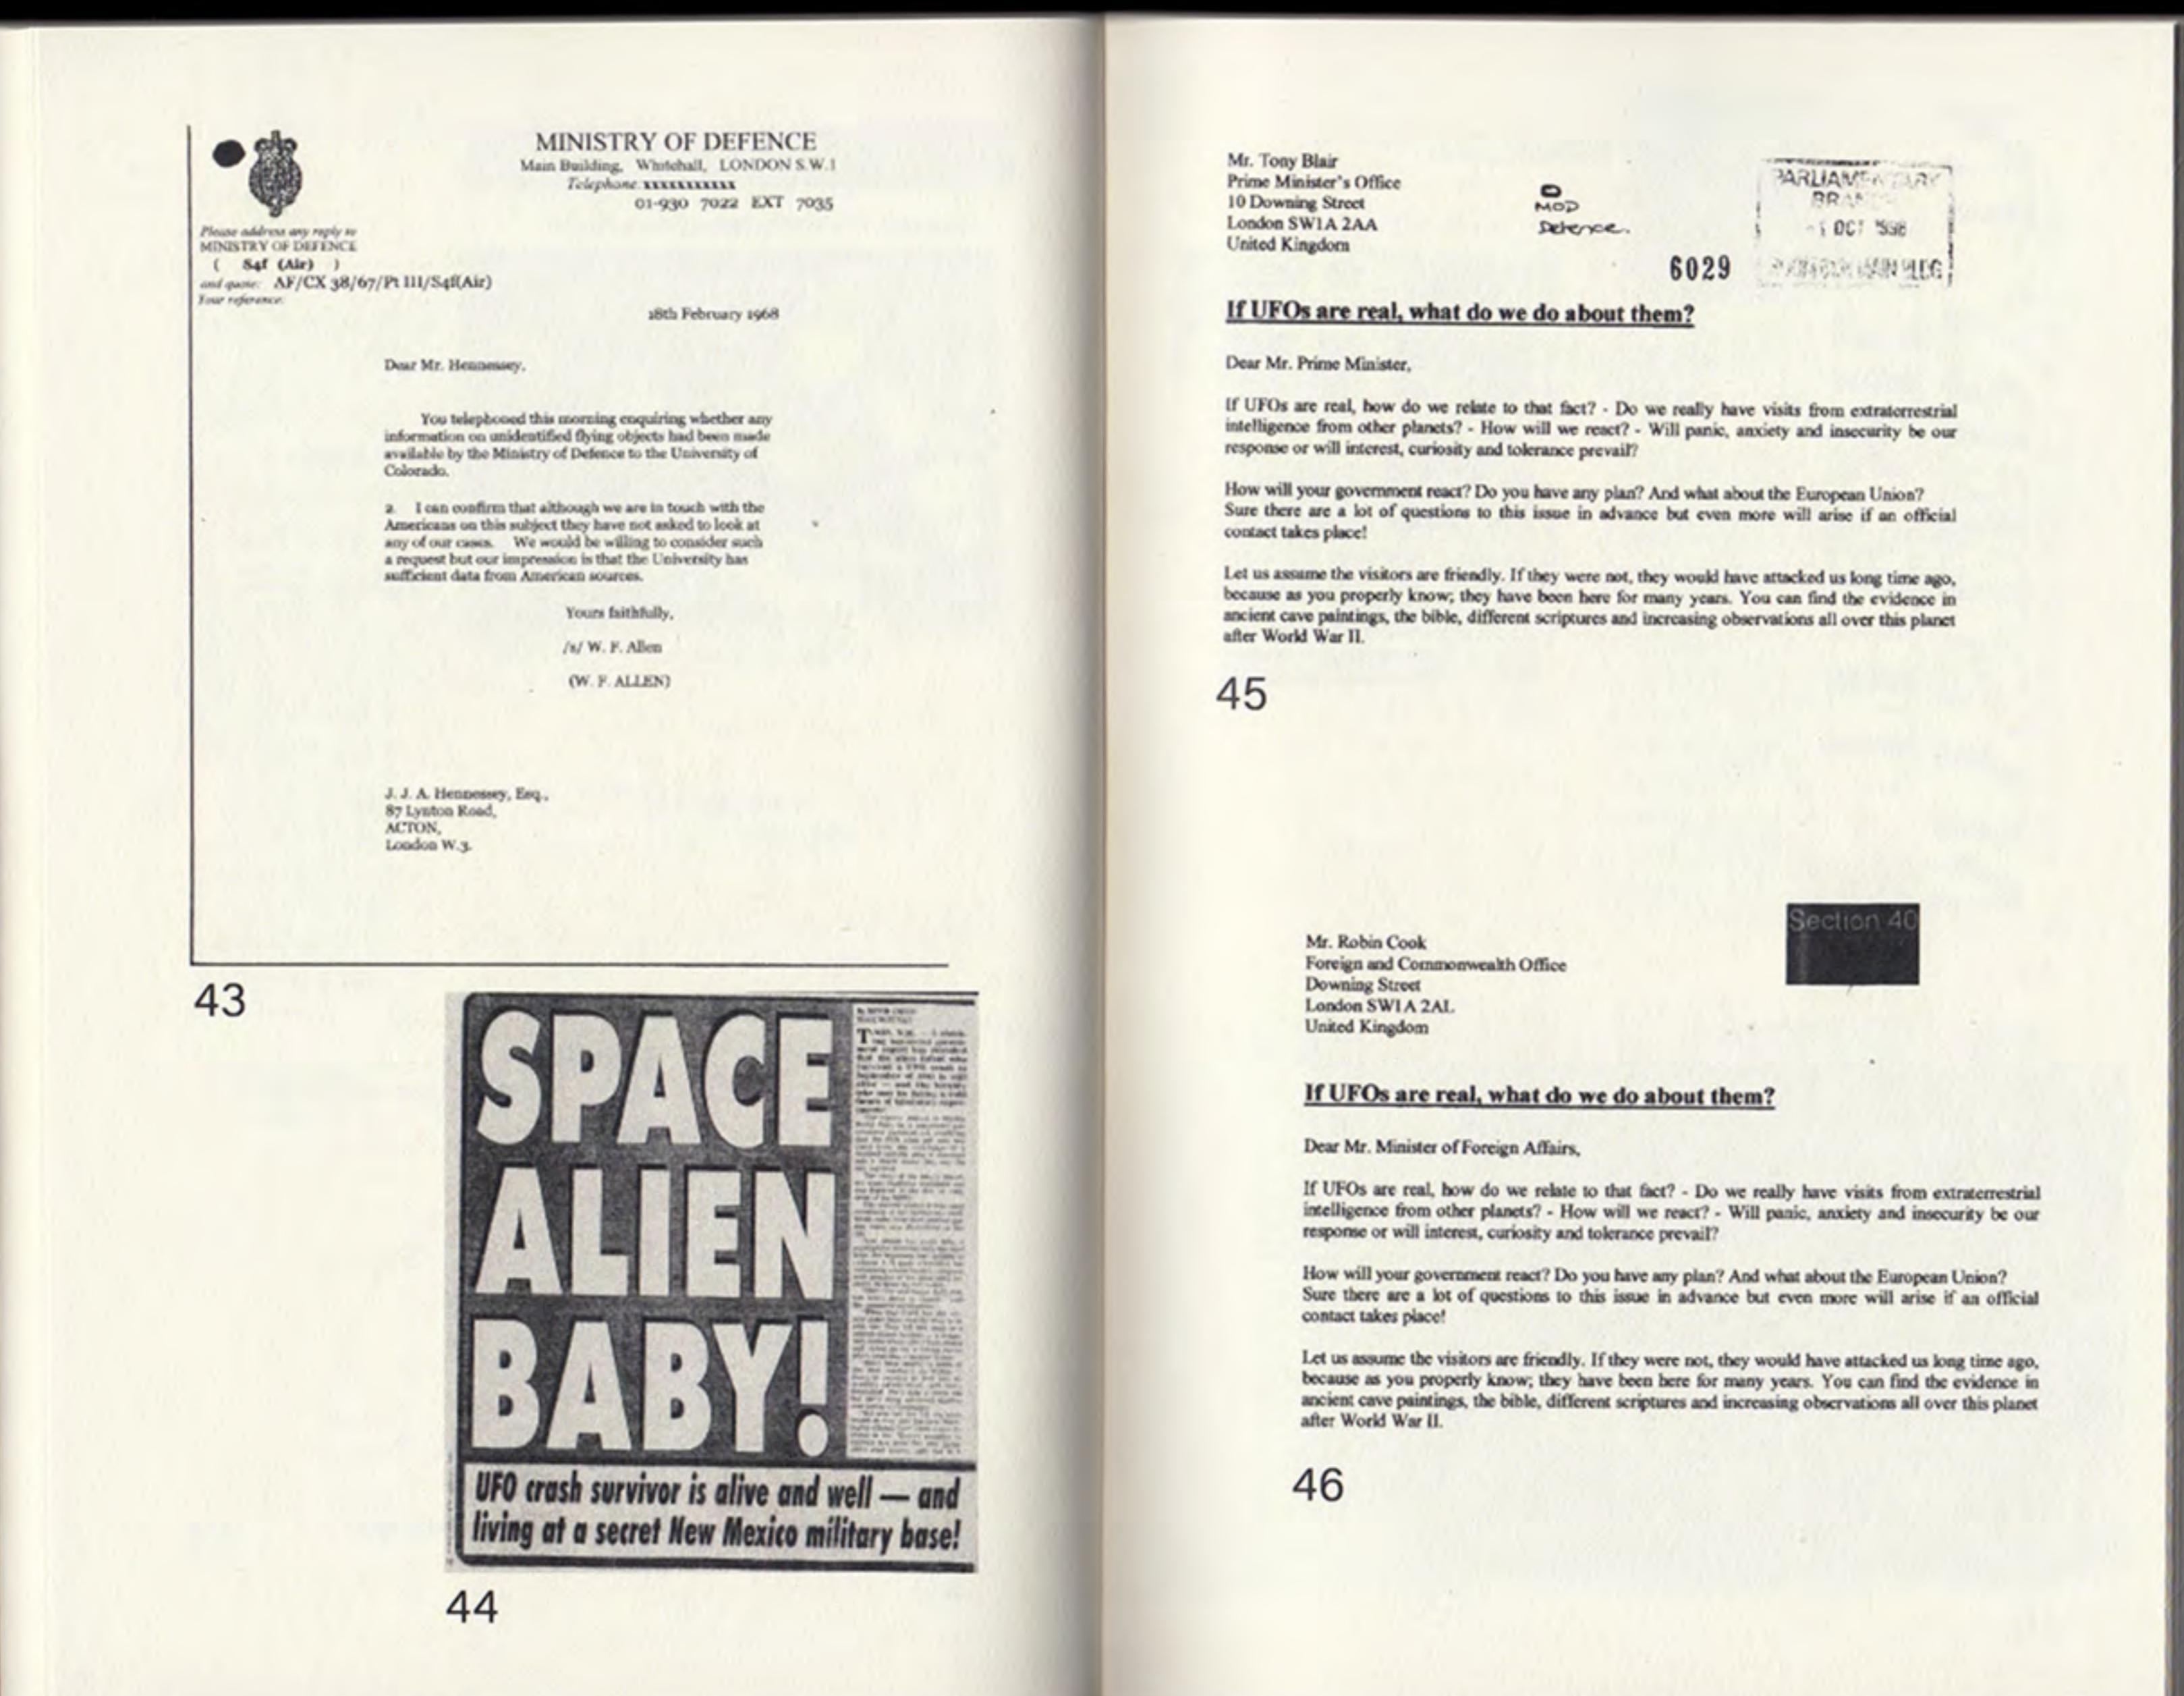

- 1) UFO policy;
  - 2) Parliamentary business including responses to PQs and PEs;
  - 3) Public correspondence;
  - 4) UFO sighting reports

Examples of Parliamentary correspondence can be found at DEFE 24/1535. This file also contains papers relating to the British Government's response to the Prime Minister of Grenada's attempts to table a debate on UFOs at the United Nations in 1977-78. Other contents include references to the French Government's UFO policy and the study group established by the French Space Agency, based at Toulouse.

UFO report files contain a mixture of letters from members of the public and reports from official sources such as the police, coastguard and Civil Aviation Authority (CAA). Many reports take the form of military signals received by MoD via a variety of RAF and RN stations. The most frequent method of reporting a UFO sighting was via a standard proforma, originally based on a USAF questionnaire. An early draft of this report format can be found at DEFE 31/118.

MOD Sighting Reports: 2002

In 776 the Saxons rebelled against Charlemagne and attacked the castle of Syburg with continued lack of success, finally deciding to storm the castle. They "saw the likeness of two shields red with flame wheeling over the church. When the heathens outside saw this miracle, they were at once thrown into confusion and started fleeing to their camp in terror. Since all of them were panic-stricken, one man stampeded the next and was killed in return, because those who looked back out of fear impaled themselves on the lances carried on the shoulders of those who fled before them. Some dealt each other aimless blows and thus suffered divine retribution"

→ Poitiers, France  
507 CE

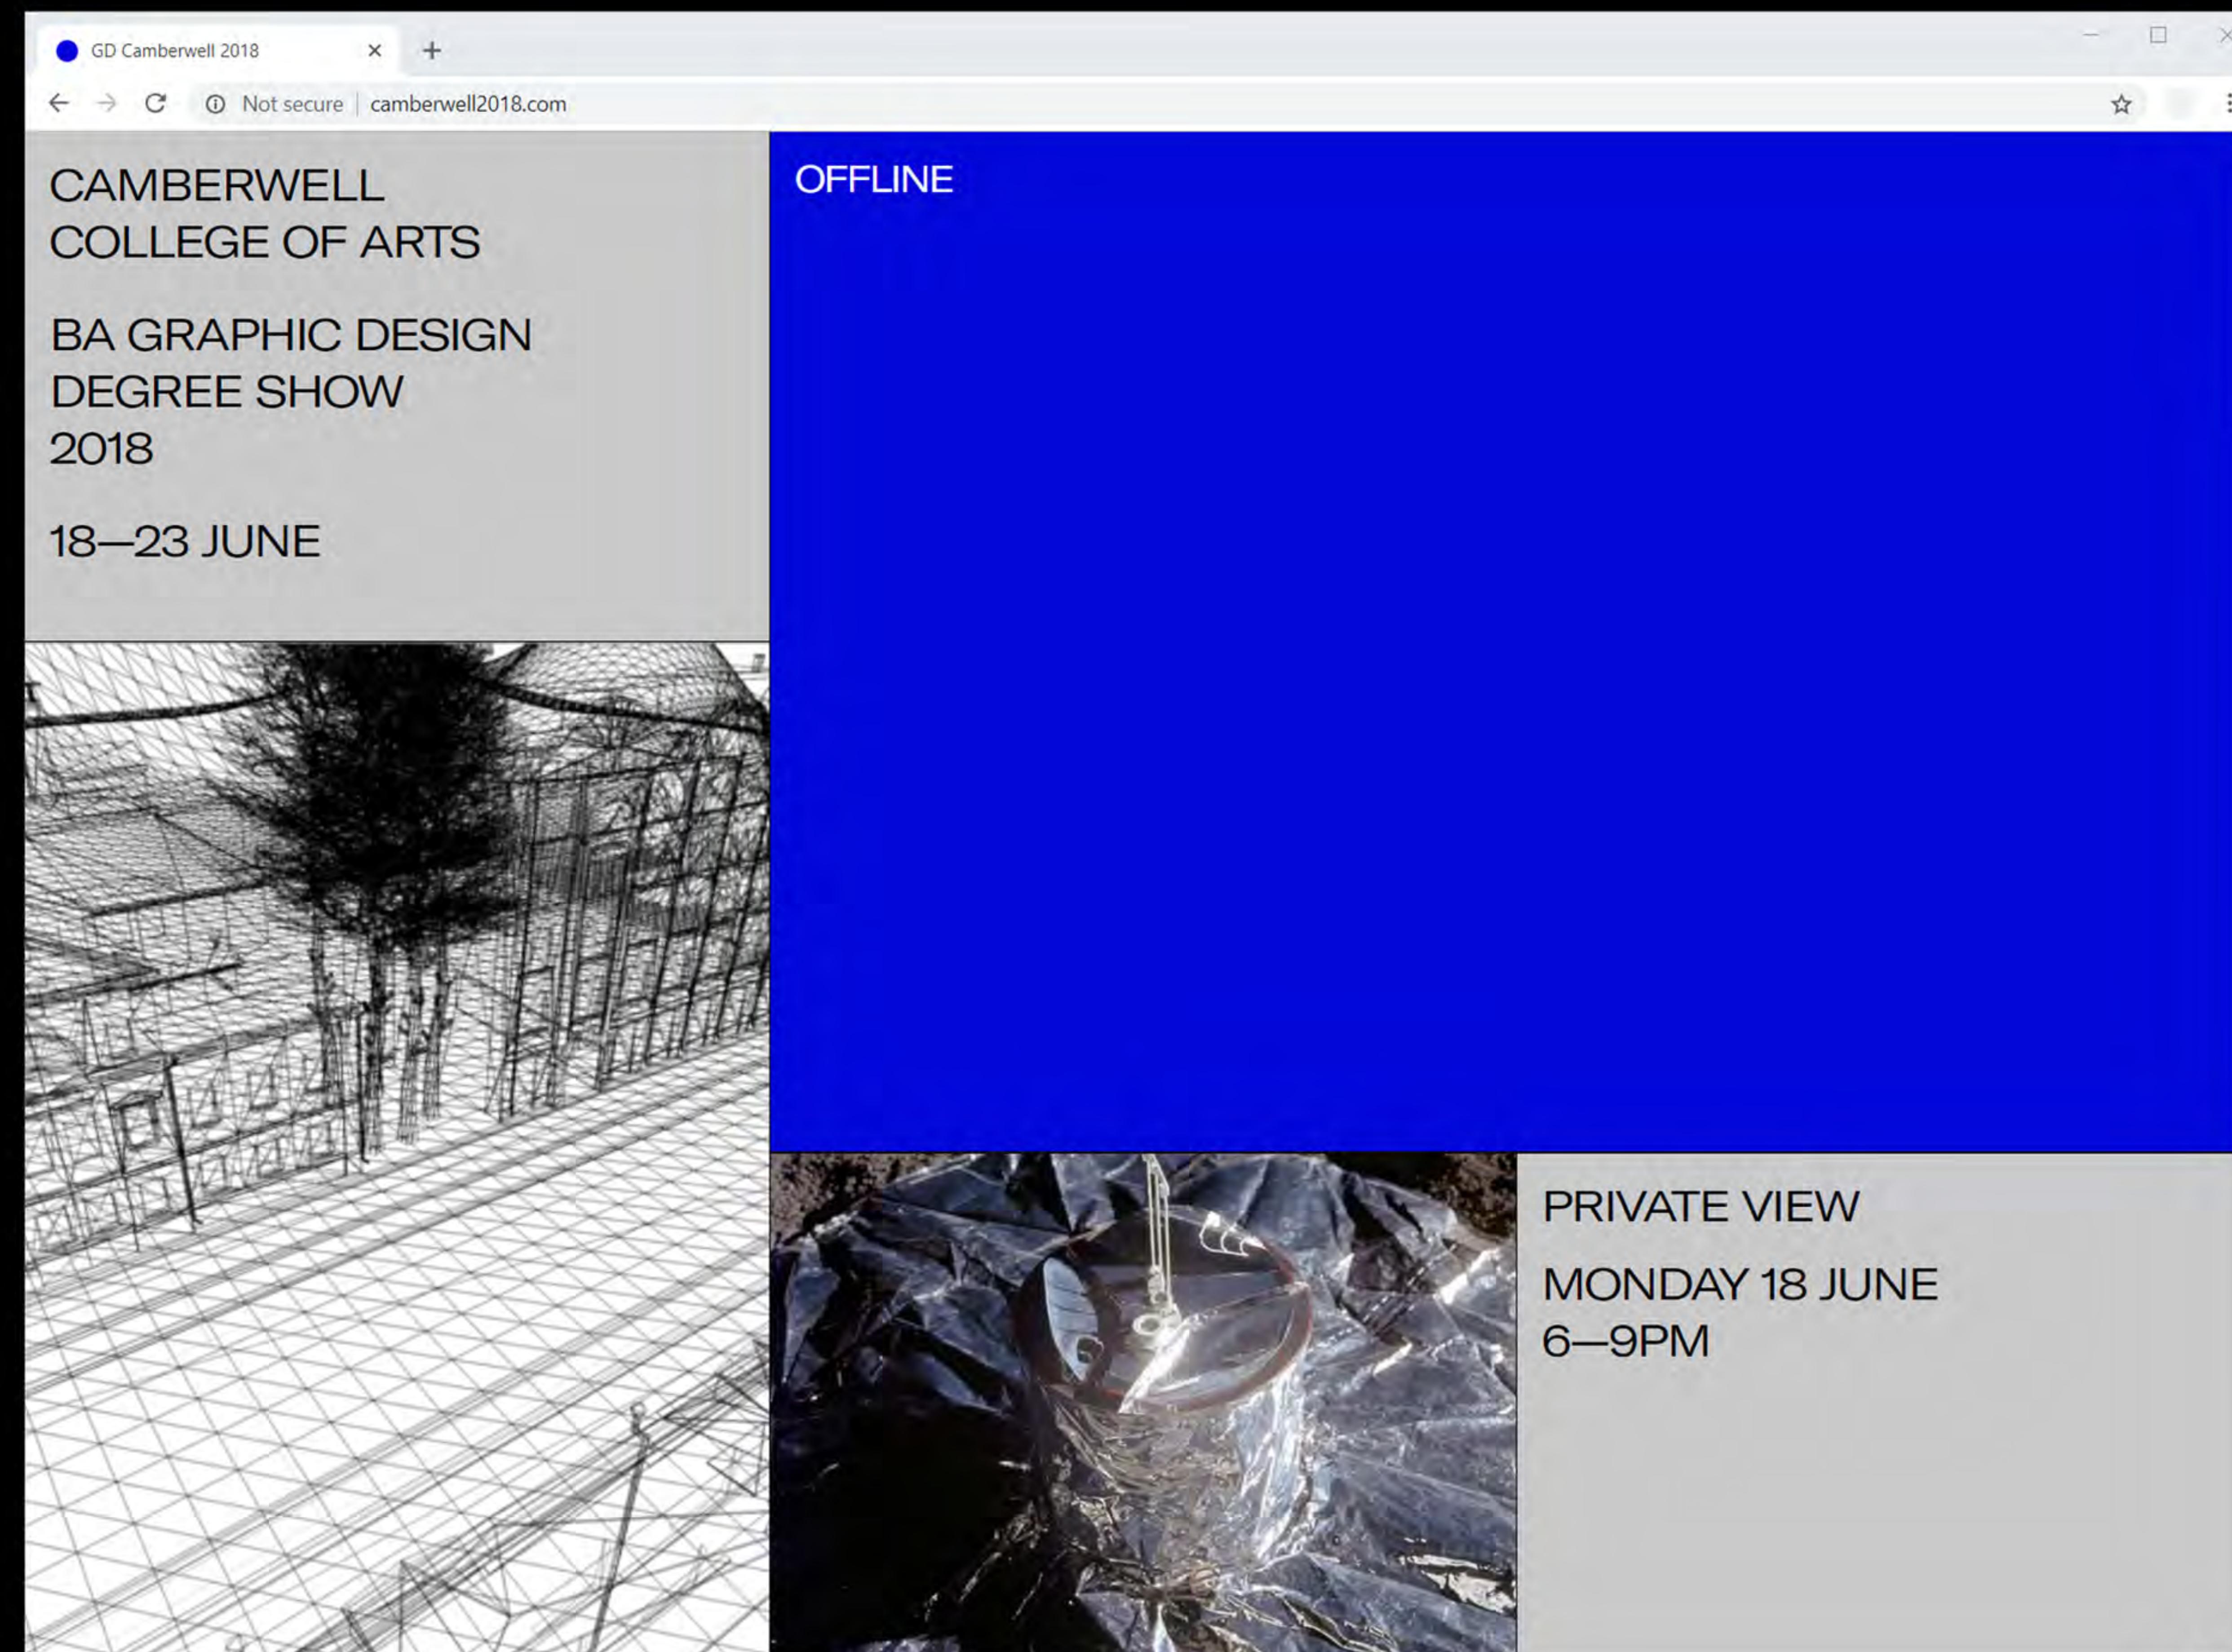

[02] When French King Clovis defeated the Visigoths, killing their King Alaric II, and taking over their French lands - "The decisive moments were wasted in idle deliberation. The Goths too hastily abandoned, perhaps, an advantageous post; and the opportunity of a secure retreat was lost by their slow and disorderly motions. After Clovis has passed the ford, as it is still named, of the Hart, he advanced with bold and hasty steps to prevent the escape of the enemy. His nocturnal march was directed by a flaming meteor, suspended in the air above the cathedral of Poitiers; and this signal, which might be previously concerted with the orthodox successor of St. Hilary, was compared to the column of fire that guided the Israelites in the desert."

02 Gibbon, Edward. *The History of the Decline and Fall of the Roman Empire*. London: T. Cadell (1837), 594.
