Four bright lights in diamond formation were sighted at 1745 by a captain lieutenant flying in aircraft south of Wisconsin. The pilots followed overtaking objects until they overtook them and continued

following them until low on fuel at which point they returned to their base. AT no time was a silhouette visible, even against the lights of Milwaukee. Visibility was almost unlimited with a broken cloud deck at 25,000 feet. The observing aircraft was at an altitude of 8,000 feet.

In 776 the Saxons rebelled against Charlemagne and attacked the castle of Syburg with continued lack of success, finally deciding to storm the castle. They "saw the likeness of two shields red with flame wheeling over the church. When the heathens outside saw this miracle, they were at once thrown into confusion and started fleeing to their camp in terror. Since all of them were panic-stricken, one man stampeded the next and was killed in return, because those who looked back out of fear impaled themselves on the lances carried on the shoulders of those who fled before them. Some dealt each other aimless blows and thus suffered divine retribution"

Unidentified Flying Objects (UFOs)

1. What is a UFO?

The first reports of 'flying saucers' being sighted were on 24 June 1947 from the Cascade Mountains of Washington state, USA. A private pilot, Kenneth Arnold, reported seeing nine strange objects that moved at tremendous speed across the sky 'like a saucer skipping on water'. His sighting triggered a wave of similar reports from observers in North America and across the world. On 8 July 1947 a report came from Roswell, New Mexico, that a disc-shaped object had landed on a remote ranch and had been removed for examination by officers from the US Eighth Army Headquarters. The age of the flying saucer had arrived.

The acronym UFO is an abbreviation for the US Air Force term 'Unidentified Flying Object'. It was coined in 1950 by Captain Edward Ruppelt of 'Project Blue Book', the USAF's official 'UFO project', to replace flying saucers, a term that was widely used by the media and public. A flying saucer is defined in the Oxford English Dictionary as 'a disc or saucer shaped object reported as appearing in the sky and alleged to come from outer space.'

5

The surviving records generally consist of four categories of material:

- 1) UFO policy;
- 2) Parliamentary business including responses to PQs and PEs;
- 3) Public correspondence;
- 4) UFO sighting reports

Examples of Parliamentary correspondence can be found at DEFE 24/1535. This file also contains papers relating to the British Government's response to the Prime Minister of Grenada's attempts to table a debate on UFOs at the United Nations in 1977-78. Other contents include references to the French Government's UFO policy and the study group established by the French Space Agency, based at Toulouse.

UFO report files contain a mixture of letters from members of the public and reports from official sources such as the police, coastguard and Civil Aviation Authority (CAA). Many reports take the form of military signals received by MoD via a variety of RAF and RN stations. The most frequent method of reporting a UFO sighting was via a standard proforma, originally based on a USAF questionnaire. An early draft of this report format can be found at DEFE 31/118.

24

A version of this questionnaire is still used today by the Ministry of Defence. The proforma contains 16 questions:

- (a) Date, time and duration of sighting
- (b) Description of object
- (c) Exact position observer
- (d) How observed
- (e) Direction in which object was first seen
- (f) Angle of sight
- (g) Distance
- (h) Movements
- (i) Meteorological conditions during observations
- (k) Nearby objects
- (l) To whom reported (police, military organisations, the press etc)
- (m) Name and address of informant
- (n) Any background on the informant that may be volunteered
- (o) Other witnesses
- (p) Date and time of receipt of report
- (q) Is a reply requested? (Note item q was deleted from 1973).

PARLIAMENTARY QUESTIONS  
1 OCT '78

0029

If UFOs are real, what do we do about them?

Dear Mr. Prime Minister,

It is a fact that we do not know what to do! Do we really have visitors from extraterrestrial intelligence from other planets? - How will we react? - Will peace, safety and security be our main concern? - Will we be forced to defend ourselves? - And what about the European Union? There are a lot of questions in this issue to advance but even more will arise if an official committee is formed.

Let us assume the visitors are friendly. If they were not, they would have struck us long time ago, because as you probably know, they have been here for many years. You can find the evidence in missing persons, the UFOs, the alien abductions, the alien life forms, the alien artifacts and increasing observations all over the planet after World War II.
